Society for Free Radical Research International

16TH BIENNIAL MEETING • Imperial College London • 6-9 September 2012 • United Kingdom

Discuss the impact of the latest research, concepts and applications of free radicals and antioxidants.

SATELLITE MEETINGS WEDNESDAY, 5 SEPTEMBER 2012

HNE Club Satellite Meeting Registration: Sherfield Building Concourse Level 1 Meeting Room: Huxley 308			
From 07:00	Registration for HNE Club Satellite Meeting		
08:30 – 08:45	Opening Address - Prof. Peter Eckl (HNE Club Chairman), University of Salzburg, Austria and Dr Corinne M. Spickett, Aston University, UK		
08:45 – 09:15	Session One - Advanced Analytical Strategies for Lipid Oxidation Products Chairs – Dr Corinne M. Spickett, Aston University, UK and Prof. Tilman Grune, University of Jena, Germany Keynote Lecture One - Post-translational Modifications in Disease - Harry Ischiropoulos, SFRBM President, University of Pennsylvania, USA		
09:15 – 09:30	HNE 1 - Novel approach to identify reactive carbonyls derived from proteins and lipids – Maria Fedorova, University of Leipzig, Germany		
09:30 – 09:45	HNE 2 - Isoprostanes and Neuroprostanes, Metabolites of omega-6 and omega-3 PUFAs: Not only Biomarkers of Lipid Peroxidation – Thierry Durand, UMR CNRS 5247 (IBMM), France		
09:45 – 10:00	HNE 3 - Molecular characterization of HDL lipid peroxidation in metabolic syndrome – John Oates, Vanderbilt University, USA		
10:00 – 10:30	Refreshment Break – Huxley 344	10:00 – 10:30	Registration for Genetics and Epigenetics of Frailty and Ageing Satellite Meeting
10:30 – 11:00	Session Two - Free Radicals and Aldehydes Chairs - Prof. Henry Forman, University of Southern California, USA, and Prof. Giuseppe Poli, University of Torino, Italy Keynote Lecture Two - Modification of Proteins by Lipid Peroxidation Products - Dennis Petersen, University of Colorado, USA	10:30 – 10:45	Introduction Chairs – Prof. Leocadio Rodríguez Mañas, Hospital Universitario de Getafe, Madrid, Spain and Prof. Howard Bergman, McGill University, Quebec, Canada
11:00 – 11:15	HNE 4 - The effect of HNE modification on the structure and function of the neuronal protein UCH-L: links to neurodegenerative disease – Sophie Jackson, Cambridge University, UK	10:45 – 11:15	The prevalence of frailty syndrome in an older population from Spain: the Toledo study for healthy ageing - Leocadio Rodríguez Mañas, Hospital Universitario de Getafe, Spain
11:15 – 11:30	HNE 5 - Doxorubicin-induced HNE adduction to ApoA1 in plasma leads to elevated brain-resident TNF-alpha with consequent oxidative stress, mitochondrial dysfunction, and neuronal death: Prevention by MESNA and implications for chemotherapeutic induced cognitive dysfunction ("chemobrain") – D. Allan Butterfield (TBC), University of Kentucky, USA	11:15 – 11:45	Searching for a Relevant Clinical and Research Concept - Howard Bergman, McGill University, Canada
11:30 – 11:45	HNE 6 - A high fructose diet induces protein glycooxidation and HNE protein modifications in rats – Luca Cannizzaro, University of Milan, Italy	11:45 – 12:15	The biological basis of frailty and late-life vulnerability – Jeremy D Walston, John Hopkins University School of Medicine, USA
11:45 – 13:15	HNE Delegates Lunch and Poster Session – Huxley 344	12:15 – 12:45	A transgenic approach to understanding age-related loss of muscle mass and function - Anne McArdle, University of Liverpool
		12:45 – 13:00	Closing Remarks – Lunch is not provided

13:15 – 13:45	Session Three - Lipid Peroxidation Products as Second Messengers in Signal Transduction Chairs - Prof. Koji Uchida, Nagoya University, Japan and Prof. Neven Zarkovic, Rudjer Boskovic Institute, Croatia		
	Keynote Lecture Three - Lipid Peroxidation Products and Redox Signaling - Henry Forman, University of Southern California, USA	12:00 – 14:00	FRR Editorial Board Meeting (Invitation only) Room: SALC 1
13:45 – 14:00	HNE 7 - Nrf2/ARE signaling pathway could be a key factor in mediating cell death resistance in pre-neoplastic Apc-mutated colonocytes upon 4-hydroxynonenal (HNE) exposure – Sabine Dalleau, INRA Toulouse, France		
14:00 – 14:15	HNE 8 -Modification of phosphatidylethanolamines mediates pro-inflammatory effects of lipid aldehydes – S.S. Davies, Vanderbilt University, USA	EU COST CM1001 ACTION Satellite Meeting 14:30 – 17:30 Registration: Sherfield Building Concourse Level 1 Room: Huxley 311	
		Writer's Satellite Meeting - How to Publish Research: Easy tips for writing great papers in high impact journals 14:30 – 16:30 Room: RSMG01	
14:15 – 14:45	Refreshment Break	14:00 – 14:30	Registration for EU COST CM1001 ACTION Satellite Meeting
		14:00 – 14:30	Registration for Writer's Satellite Meeting
14:45 – 15:15	Keynote Lecture Four- Signalling Properties of 4-Hydroxyalkenals formed by Lipid Peroxidation in Diabetes - Shlomo Sasson, Hebrew University of Jerusalem, Israel	14:30 – 14:45	Introduction Protein Oxidation and Modification Chairs – Prof. Tilman Grune, University of Jena, Germany and Prof. Caroline Baron, Technical University of Denmark
15:15 – 15:30	HNE 9 -Interaction between oxidized lipids and amyloid-β in amplifying neuronal damage in Alzheimer disease – Paola Gamba, University of Torino, Italy	14:45 – 15:15	Molecular aspects on the selectivity and consequences of protein tyrosine nitration - Rafael Radi, Universidad de la República, Uruguay
15:30 – 16:00	Session Four – Hermann Esterbauer Award Lecture Chair - Prof. Peter Eckl, University of Salzburg, Austria Puzzles, patterns and LDL: a mass spectrometrists' view – Ana Reis, Aston University, UK	15:15 – 15:45	N-linked oligosaccharides of glycoproteins are altered during aging and are possible regulators of the somatotrophic axis- Valerie Van Hooren, University of Gent, Belgium
16:00 – 17:00	HNE Delegates Drinks, Poster Presentations and Awards	15:45 – 16:15	Protein oxidation and proteomics – challenges and pitfalls - Adelina Rogowska-Wrzesinska, University of Southern Denmark
		16:15 – 16:45	Protein modification and MS-detection - Pedro Domingues, Universidade de Aveiro Santiago, Portugal
		16:45 – 17:15	Evaluation of selected antioxidants on protein oxidation - Caroline Baron, Technical University of Denmark
		17:15 – 17:30	Closing Remarks

SFRRi MEETING
THURSDAY, 6 – SUNDAY, 9 SEPTEMBER 2012

Thursday, 6 September 2012

07:00	SFRRi Conference Registration Opens	
08:30 – 08:55	Welcome Address (Great Hall) Prof. Giovanni Mann, Secretary General SFRR International, Meeting Chairman, King's College London, UK	
08:55 – 09:00	Introduction to SFRRi Trevor Slater Lecture (Great Hall) Prof. Malcolm Jackson, President, SFRR International, University of Liverpool, UK	
09:00 – 09:30	SFRRi Trevor Slater Lecture (Great Hall) Oxidants and Antioxidants in Biology: A Historical Perspective Prof. Lester Packer, University of Southern California, USA	
09:40 – 12:05	Symposium 1 - Translating the Powerhouse: Mitochondrial Redox Signaling – sponsored by: 	Symposium 2 - Phytochemicals (Micronutrients) in Redox Signaling– sponsored by: 
	Room: Great Hall	Rooms: Huxley 308 and via video link to Huxley 311
09:40 – 09:45	Introduction Chairs – Dr. Michael Murphy, MRC Mitochondrial Biology Unit, UK and Prof. Victor Darley-Usmar, University of Alabama, USA	Introduction Chairs – Prof. Cesar Fraga, University of Buenos Aires, Argentina and Prof. Helmut Sies, Düsseldorf, Germany
09:45 – 10:10	Beyond Retrograde and Anterograde Signaling: Mitochondrial – Nuclear Interactions as a means for Evolutionary Adaptation and Contemporary Disease - Scott Ballinger, University of Alabama, USA	Redox modulation of pro-inflammatory and anti-inflammatory signaling by chemopreventive phytochemicals – Young-Joon Surh, Seoul National University, Republic of Korea
10:10 – 10:35	Mitochondrial reactive oxygen species increase platelet activation in Sickle Cell disease - Sruti Shiva, University of Pittsburgh, USA	Dietary flavonoids: Role of (-)-epicatechin and related procyanidins in cell signaling - Patricia Oteiza, University of California, Davis, USA
10:35 – 11:05	Refreshment Break	
11:05 – 11:30	Mitochondrial energy metabolism in brain aging and neurodegeneration - Enrique Cadenas, University of Southern California, Los Angeles, USA	Nitric oxide regulation by polyphenols: from calcium homeostasis to diabetes and heart failure - Francisco Villarreal, UCSD School of Medicine, USA
11:30 – 11:55	Neuroprotection by targeting antioxidant α-glutamylcysteine to mitochondria - Juan P Bolaños, Universidad de Salamanca, Spain	The impact of fruit flavonoids on memory and cognition - Jeremy Spencer, University of Reading, UK
11:55 – 12:05	Closing comments for Symposium 1	Closing comments for Symposium 2
12:05 – 13:05	Lunch with Poster Presentations	
	Room: Great Hall	Rooms: Huxley 308 and via video link to Huxley 311
13:05 – 15:00	Symposium 3 - Translating the Powerhouse: Mitochondrial Therapeutics – sponsored by: 	Symposium 4 - Insulin Resistance and Redox-Modulated Signaling – sponsored by: 
13:05 – 13:10	Introduction Chairs – Sruti Shiva, University of Pittsburgh, USA and Prof. Juan P Bolaños, Universidad de Salamanca, Spain	Introduction Chairs – Prof. Giuseppe Poli, University of Torino, Italy and Prof. Juan Sastre, University of Valencia, Spain
13:10 – 13:35	Mitochondrially targeted antioxidants: a therapeutic strategy - Michael Murphy, MRC Mitochondrial Biology Unit, UK	Obesity and low-grade inflammation - Brigitte Winklhofer-Roob, Karl-Franzens Universität, Austria
13:35 – 14:00	Mitochondrial therapeutics in alcohol dependent hepatotoxicity - Victor Darley-Usmar, University of Alabama, USA	Lipokines and oxysterols: Novel adipose-derived lipid hormones linking adipose dysfunction and insulin resistance – Giuseppe Murdolo, University of Perugia, Italy
14:00 – 14:25	Mitochondrial targets for cardioprotective therapeutics Paul S. Brookes, University of Rochester Medical Center, USA	Importance of insulin resistance to vascular repair and regeneration – Mark Kearney, University of Leeds, UK
14:25 – 14:50	Modulating the mitochondrial FOF1-ATPASE as a therapeutic strategy for systematic autoimmunity - Gary S. Glick, University of Michigan, USA	The role of oxidative stress in insulin signaling and muscle damage induced by exercise - Wataru Aoi, Kyoto Prefectural University, Japan
14:50 – 15:00	Closing comments for Symposium 3	Closing comments for Symposium 4
15:00 – 15:30	Refreshment Break	

15:30 – 17:30	Signal Transduction Oral Presentations Co-Chairs: Nesrin Kartal-Ozer (Turkey) Helen Griffiths (UK)	Oxidative Stress in Animals and Plants Oral Presentations Co-Chairs: Grzegorz Bartosz (Poland) Richard Siow (UK)	Antioxidants, Nutrition and Novel Therapies Oral Presentations Co-Chairs: Leopold Flohe (Germany) Roland Stocker (Australia)
	Room: Great Hall	Room: Clore Theatre	Room: Huxley 308
15:30 – 15:45	O1 Oxidative inactivation of the thioredoxin peroxidase activity of a peroxiredoxin is important for thioredoxin-mediated repair of oxidised proteins and cell survival A.M. Day*, J.D. Brown, S.R. Taylor, J.D. Rand, B.A. Morgan, E.A. Veal, <i>Newcastle University, UK</i>	O2 Disulfide stress as a novel type of oxidative stress in acute inflammation M.L. Moreno ^{*1} , J. Escobar ¹ , A. Gil ¹ , A. Izquierdo-Álvarez ² , A. Martínez-Ruiz ² , J. Sastre ¹ , ¹ <i>University of Valencia, Spain</i> , ² <i>Hospital de la Princesa, Spain</i>	O3 Acetylsalicylic acid induced oxidative modification of ZO-1 reduces the tightness of small intestinal epithelial cell O. Handa*, Y. Naito, A. Fukui, Y. Qin, T. Takagi, T. Yoshikawa, <i>Kyoto Prefectural University of Medicine, Japan</i>
15:45 – 16:00	O4 Hyperoxia regulates the degradation of the circadian protein Rev-Erba: implications for cytoprotection M.D. Hinson ² , C. Biswas ¹ , P. La ² , G. Yang ² , P.A. Dennerly ^{*1,2} , ¹ <i>University of Pennsylvania, USA</i> , ² <i>Children's Hospital of Philadelphia, USA</i>	O5 Monitoring dynamic compartment-specific changes of glutathione redox state using redox-sensitive YFP sensors A. Banach-Latapy ^{*1,2} , M. Dardalhon ^{1,2} , T. He ^{1,2} , L. Vernis ^{1,2} , R. Chanet ^{1,2} , M.E. Huang ^{1,2} , ¹ <i>CNRS, France</i> , ² <i>Centre Universitaire, France</i>	O6 The endogenous radical scavenger A1M binds to Complex I and protects mitochondrial structure and function; an novel cellular protective mechanism M.G. Olsson ^{*1} , L.W. Rosenlöf ¹ , H. Kotarsky ¹ , M. Mörgelin ¹ , V. Fellman ^{1,2} , B. Åkerström ¹ , ¹ <i>Lund University, Sweden</i> , ² <i>University of Helsinki, Finland</i>
16:00 – 16:15	O7 Understanding the role of Nrf2 signalling in the cellular defence against iron toxicity: Nrf2 protects against dietary iron-induced liver injury S. Silva-Gomes, A.G. Santos, C. Caldas, J.V. Neves, P.N. Rodrigues, T.L. Duarte*, <i>Institute for Molecular and Cell Biology, Portugal</i>	O8 Redox regulation in the daily acclimation of chloroplasts to light H. Peled-Zehavi*, I. Dangoor, A. Danon, <i>The Weizmann Institute of Science, Israel</i>	O9 Characterising the effect of novel slow-release H2S donors on pro-inflammatory enzyme activity in human cartilage cells B. Fox*, T. Holland, A. Perry, M.E. Wood, M. Whiteman, <i>University of Exeter, UK</i>
16:15 – 16:30	O10 Nrf2 activation remarkably improves exercise endurance capacity in mice O. Sechang ^{*1} , E.W. Warabi ¹ , M.Y. Yamamoto ² , K.T. Tanaka ¹ , J.S. Shoda ¹ , ¹ <i>University of Tsukuba, Japan</i> , ² <i>University of Tohoku, Japan</i>	O11 Peroxisome Proliferator - Activated receptor-α a Key Modulator in Oxidative Stress and Impaired Mitochondrial Function in a Mouse Model of DDC Induced Hepatotoxicity A.P. Nikam*, J. Patankar, E. Schöck, K. Kashofer, K. Zatloukal, P.M. Abuja, <i>Medical University of Graz, Austria</i>	O12 Quercetin Attenuates Aluminum-Induced Apoptosis In Rat Hippocampus, By Preventing Cytochrome c Translocation, Bcl-2 Decrease, Bax Elevation, Caspase-3 And p53 Activation D.R. Sharma ^{*1} , A. Sunkaria ¹ , D. Verma ¹ , K.D. Gill ¹ , ¹ <i>Post Graduate Institute of Medical Education and Research, India</i> , ² <i>Post Graduate Institute of Medical Education and Research, India</i>
16:30 – 16:45	O13 Control of ARE-linked gene expression by cytoplasm-nucleus translocational oscillations of Nrf2 M. Xue, H. Momiji, N. Rabbani, G. Barker, D.A. Rand, P.J. Thornalley*, <i>University of Warwick, UK</i>	O14 Higher oxidative stress in human dental pulp stem cells cultured at 21% O2 compared to 5% O2 M. El Alami ^{*1} , J.A. Viña ¹ , K.M. Abdelaziz ¹ , V. Bonet-Costa ¹ , R. López Grueso ¹ , G. Olaso ¹ , M. Inglés ¹ , M. Dromant ¹ , R. Edo ¹ , C. Borrás ¹ , J. Gambini ¹ , R.C. Siow ² , S.J. Chapple ² , G.E. Mann ² , M. Peñarrocha ¹ , J. Viña ¹ , ¹ <i>Universidad de Valencia, Spain</i> , ² <i>King's College London, UK</i>	O15 (-)-Epicatechin increases systemic Nrf2-dependent response and vascular function in mice M.M. Cortese-Krott ^{*1} , T. Krenz ¹ , A. Rodriguez-Mateos ² , F. Oberle ¹ , S. Sivarajah ¹ , M. Kelm ¹ , ¹ <i>Heinrich Heine University, Germany</i> , ² <i>University of Reading, UK</i>
16:45 – 17:00	O16 A conserved prokaryotic region of GCN5L1 is required for mitochondrial acetyltransferase function. I. Scott*, B.R. Webster, M.N. Sack, <i>National Heart, Lung and Blood Institute, USA</i>	O17 Metal ions can hitch a ride with flavonones on glucose transporters E. Vlachodimitropoulou*, P.A. Sharp, G.E. Mann, S. Pardalaki, R.J. Naftalin, <i>King's College London, UK</i>	O18 Quantification of the antioxidant depletion capacity of air pollutants I.N. Katsaiti*, H. Walton, F.J. Kelly, <i>King's College London, UK</i>
17:00 – 17:15	O19 A Role for Nox4 in the Regulation of Cardiomyocyte Proliferation in vivo A.C. Brewer*, T.V. Murray, I. Smyrniak, B. Yu, A.M. Shah, <i>King's College London British Heart Foundation Centre of Research Excellence, Cardiovascular Division, London, UK</i>	O20 Impact of ferredoxin:NADP(H) oxidoreductase on redox poise of the glutathione pool and Fenton reaction capacity of thylakoid membranes: a connection to pre-acquired acclimation in Arabidopsis T. Goss, M. Twachtmann, A. Mulkidjanian, H.J. Steinhoff, J.P. Klare*, G.T. Hanke, <i>University of Osnabrueck, Germany</i>	O21 Oxidative stress impaired HIF1a activation: a novel mechanism for increased vulnerability of steatotic hepatocytes to hypoxic stress S. Anavi, N. Budick Harmelin, Z. Madar, O. Tirosh*, <i>The Hebrew University of Jerusalem, Israel</i>

17:15 – 17:30	O22 Reactive oxygen species-mediated regulation of mitochondrial biogenesis in the yeast <i>Saccharomyces cerevisiae</i>. E.D. Yoboue, C. Chevtzoff, M. Rigoulet, A. Devin*, <i>Université Bordeaux Segalen, France</i>	O23 Cholestasis is associated with hepatic microvascular dysfunction and aberrant energy metabolism before and during ischemia-reperfusion M. Heger* ^{1,2} , J.J. Kloek ¹ , X. Marechal ³ , J. Roelofsen ¹ , R.H. Houtkooper ¹ , A.B. van Kuilenburg ¹ , ¹ <i>University of Amsterdam, The Netherlands</i> , ² <i>University of Utrecht, The Netherlands</i> , ³ <i>Lille University Hospital, France</i>	O24 Ionizing radiation induces mitochondrial reactive oxygen species production accompanied by upregulation of mitochondrial electron transport chain function and mitochondrial content under control of the cell cycle checkpoint T. Yamamori*, H. Yasui, M. Yamazumi, Y. Wada, H. Nakamura, O. Inanami, <i>Hokkaido University, Japan</i>
17.00-18.00			FRBM Editors Meeting (Invitation only) (SALC 1)
17:30 – 19:00	Drinks with Poster Presentations (Queens Tower Room & Huxley Building 344)		
19:00 – 20:00	Welcome Reception (Queens Tower Room & Huxley Building 344)		

Friday, 7 September 2012			
07:30	Conference Registration Open		
08:30 – 10:30	Symposium 5 - Caught in a Trap: Neutrophil Extracellular Traps, Reactive Oxygen Species and Inflammation	Symposium 6 - Reactive Oxygen Species Revisited: Promoting Lifespan by Low-dose Reactive Oxygen Species	
	Room: Huxley 308 and via video link to Huxley 311	Rooms: Great Hall	
08:30 – 08:35	Introduction Chairs - Dr. Paul Cooper, University of Birmingham, UK Dr. Shida Yousefi, University of Bern, Switzerland	Introduction Chairs – Prof. Michael Ristow, University of Jena, Germany and Prof. Toren Finkel, NIH, Baltimore, USA	
08:35 – 09:00	Neutrophil extracellular traps: a novel ROS-dependent innate immune defence - Arturo Zychlinsky, Max Planck Institute for Infection Biology, Germany	Antioxidant supplements in primary or secondary prevention increase mortality in humans - Christian Gluud, University of Copenhagen, Denmark	
09:00 – 09:25	The mitochondrial angle: viable granulocyte extracellular trap production - Shida Yousefi, University of Bern, Switzerland	Beyond the oxidative damage theory: Does hyperfunction cause ageing in C. elegans? - David Gems, University College London, UK	
09:25 – 09:50	A Novel Rapid NET Release Mechanism without Neutrophil Death - Paul Kubes, University of Calgary, Canada	Mitohormesis: non-linear signaling responses to metabolic ROS formation - Michael Ristow, University of Jena, Germany	
09:50 - 10:15	Neutrophil extracellular traps in the pathogenesis of autoimmune disease - Dagmar Scheel-Toellner, University of Birmingham, UK	Oxidants, metabolism and stem cell function - Toren Finkel, National Institutes of Health, USA	
10:15 – 10:30	Closing comments for Symposium 5		Closing comments for Symposium 6
10:30 – 11:00	Refreshment Break - Queens Tower Room & Huxley Building 344		
11:00 – 13:00	Symposium 7 – Peroxiredoxins, Thioredoxins and Glutathione Peroxidases	Symposium 8 - Redox Regulation of RNA and microRNA in Health and Disease	
	Room: Great Hall	Rooms: Huxley 308 and via video link to Huxley 311	
11:00 – 11:05	Introduction Chairs - Prof. Christine Winterbourn, University of Otago, New Zealand and Prof. Junji Yodoi, Kyoto University, Japan	Introduction Chairs – Dr Richard Siow, King's College London, UK and Prof. Henrik Poulsen, University of Copenhagen, Denmark	
11:05 – 11:30	The still mysterious speed of thiol-dependent peroxidases - Leopold Flohe, Otto-von-Guericke-Universität Magdeburg, Germany	RNA oxidation in disease - Henrik Poulsen, University of Copenhagen, Denmark	
11:30 – 11:55	Regulation of steroidogenesis via H₂O₂-dependent, reversible inactivation of peroxiredoxin III in mitochondria - Sue Goo Rhee, Ewha Womans University, Republic of Korea	MicroRNAs regulating oxidative stress and inflammation in obesity and atherosclerosis - Paul Holvoet, University of Leuven, Belgium	
11:55 – 12:20	Thiol-redox compartmentation in the eukaryotic cell – Michel Toledano, Gif-sur-Yvette, France	MicroRNA Control of Wound Angiogenesis – Sashwati Roy, Ohio State University, USA	
12:20 – 12:45	Thioredoxin binding protein-2 (TBP-2)/ Txnip/ VDUP with multifunctional biostress signal regulatory activities – Hiroshi Masutani, Kyoto University, Japan	Circulating microRNAs: cellular origin and biomarker potential - Manuel Mayr, King's College London, UK	
12:45 – 13:00	Closing comments for Symposium 7		Closing comments for Symposium 8
13:00 – 14:00	Lunch with Poster Presentations - Queens Tower Room & Huxley Building 344		SFRRI Committee Meeting (Salc 1)
14:00 – 14:50	SFRRI Europe Lecture (Introduced by Giovanni Mann, King's College London, UK) Proteasome and Lon: A Saga of Sex, Drugs, Stress and Ageing Prof. Kelvin J. A. Davies, University of Southern California, USA Room: Great Hall		
15:00 – 17:00	Inflammation and Immunity Oral Presentations Co-Chairs: Yuji Naito (Japan) Phyllis Dennery (USA)	Cancer and Ageing Oral Presentations Co-Chairs: Daniela Caporossi (Italy) Holly van Remmen (USA)	Cardiovascular, Metabolic & Environmental Disorders I Oral Presentations Co-Chairs: Frank Kelly (UK) Niki Chondrogianni (Greece)
	Room: Clore	Room: Great Hall	Room: Huxley 308
15:00 – 15:15	O25 Oxidative stress as a cause for autoimmune hemolytic anemia; supporting evidences from genetically modified mice T. Konno, N. Ohtsuki, N. Kibe, S. Tsunoda, Y. Iuchi, J. Fujii*, Yamagata University, Japan	O26 The effect of redox microenvironment and antioxidant interference on the telomerase activity of normal liver cells and hepatoma cells D.Y. Shi ^{1,2} , Y.L. Sui ¹ , J. Wang ¹ , P.Y. I ¹ , F.Z. Xie ² , S.L. Liu ² , ¹ Shanghai Medical College of Fudan University, China, ² Fudan University, China	O27 Heme oxygenase 1 induction in the peri-infarct region after cerebral ischemia-reperfusion injury in rats is associated with reduced blood-brain barrier breakdown A. Alfieri ¹ , S. Srivastava ¹ , R.C.M. Siow ¹ , M.R. Duchene ² , P.A. Fraser ¹ , G.E. Mann ¹ ¹ Kings College London, UK, ² University College London, UK
15:15 – 15:30	O28 Modulation of Th1/Th17 equilibrium in vitro by Indicaxanthin from Opuntia Ficus Indica (L. Mill) M. Allegra ^{*1} , L. Rattazzi ² , A. Attanzio ¹ , L. Tesoriere ¹ , M.A. Livrea ¹ , F. D'Acquisto ² , ¹ Università di Palermo, Italy, ² Queen Mary University of London,	O29 Tumor microenvironment and oxidative stress: involvement in metabolic reprogramming and chemoresistance of prostate cancer cells M.L. Taddei, T. Fiaschi, A. Marini, V. Farini, S. Stinziani, P. Chiarugi*, University of Florence, Italy	O30 Kriti1 and reactive oxygen species: a novel molecular pathway involved in cerebral cavernous malformations L. Goitre, M. Villoria-Recio, V. Cutano, R. Canzonieri, E. Trapani, A. Morina, F. Retta*, University of Turin, Italy

	UK		
15:30 – 15:45	O31 ROS as signalling molecule in TNF-α mediated Nrf2 activation in macrophages A. Fragoulis*, A. Greiber, C. Rosen, T. Pufe, C.J. Wruck, <i>Department of Anatomy and Cell Biology, Germany</i>	O32 Asbestos surface provides a niche for oxidative modification: A novel role of free radicals in carcinogenesis H. Nagai, Y. Okazaki, L. Jiang, S. Akatsuka, Y. Yamashita, S. Toyokuni*, <i>Nagoya University, Japan</i>	O33 A dithiol/disulfide redox switch in the dehydrogenase region on Nox2 regulates the assembly of the superoxide-generating NADPH oxidase of phagocytes E. Pick, <i>Tel Aviv University, Israel</i>
15:45 – 16:00	O34 The role of phosphatidylserine externalisation and oxidation in C1q-dependent apoptotic cell clearance M.J. Smallwood* ¹ , S.A. Jewell ² , P.G. Petrov ² , C.P. Winlove ² , P. Eggleton ¹ , P.G. Winyard ¹ , ¹ <i>Peninsula Medical School, Exeter University, UK, ²School of Physics, University of Exeter, UK</i>	O35 Compromised antioxidant enzyme adaptation to cigarette smoke in patients with chronic obstructive pulmonary disease (COPD) R.E. Dove* ¹ , E. Roos-Engstrand ² , A. Blomberg ² , A. Behndig ² , I.S. Mudway ¹ , ¹ <i>King's College London, UK, ²Umeå University, Sweden</i>	O36 The role of NOX isoforms in ischemia/reperfusion injury of different organs K. Wingler ¹ , K. Radermacher ¹ , P.W.M. Kleikers* ¹ , S. Altenhoefer ¹ , N. Weissmann ² , H.H.H.S. Schmidt ¹ , ¹ <i>Maastricht University, The Netherlands, ²University Giessen Lung Centre, The Netherlands</i>
16:00 – 16:15	O37 Sulforaphane decreases neutrophil hyperactivity by reducing intracellular oxidative stress H.K.I. Dias ¹ , M. Milward ² , M. Grant ² , I.L.C. Chapple ² , H.R. Griffiths* ¹ , ¹ <i>Aston University, UK, ²The University of Birmingham, UK</i>	O38 Eccentric exercise as an oxidant stimulus for studying redox homeostasis: an aging study M.G. Nikolaidis* ¹ , A. Kyparos ¹ , C. Spanou ¹ , V. Paschalis ² , A.A. Theodorou ³ , G.V. Grivas ¹ , ¹ <i>Aristotle University of Thessaloniki, Greece, ²University of Thessaly, Greece, ³European University of Cyprus, Cyprus</i>	O39 Nox4-dependent regulation of endoplasmic reticulum stress in cardiac cells C.X. Santos*, A.C. Brewer, M. Zhang, N. Anilkumar, A.M. Ajay, <i>King's College London British Heart Foundation Centre, Cardiovascular Division, UK</i>
16:15 – 16:30	O40 Peroxiredoxin-6 plays the protective role against intestinal inflammation T.T. Takagi*, Y.N. Naito, T.T. Tsuji, O.H. Handa, H.I. Ichikawa, T.Y. Yoshikawa, <i>Kyoto Prefectural University of Medicine, Japan</i>	O41 Mitochondrial architecture, oxidant production, and redox signaling in malignant mesothelioma cells B.S. Cunliffe* ¹ , K. Newick ¹ , J. Stumpff ¹ , J.A. Melendez ² , B. Kalyanaraman ³ , N. Heintz ¹ , ¹ <i>University of Vermont, USA, ²Albany Medical College, USA, ³Medical College of Wisconsin, USA</i>	O42 Cardiac mitochondrial bioenergetics in endotoxemia V. Vanasco, N. Magnani, M.C. Cimolai, L.B. Valdez, P. Evelson, S. Alvarez*, <i>University of Buenos Aires, Argentina</i>
16:30 – 16:45	O43 Mycoredoxin-1 is one of the missing links in the oxidative stress defense mechanism of <i>Mycobacterium tuberculosis</i> K. Van Laer ^{1,2} , L. Buts ¹ , N. Follon ³ , D. Vertommen ⁴ , N.A.J. Van Nuland ^{1,2} , J. Messens* ^{1,2} , ¹ <i>VIB-Vrije Universiteit Brussel, Belgium, ²Brussels Center for Redox Biology, Belgium, ³Karolinska Institutet, Sweden, ⁴de Duve Instituut, Belgium</i>	O44 Investigating the intracellular changes in ROS production and adaptive responses in muscle specific SOD1 knockout mice G.K. Sakellariou* ¹ , A. Kayani ¹ , A. Vasilaki ¹ , A. Scott ¹ , H. Van Remmen ² , S. Brooks ³ , A. McArdle ¹ , M.J. Jackson ¹ , ¹ <i>University of Liverpool, Liverpool, UK, ²University of Texas Health Center at San Antonio and the Barshop Institute for Longevity and Aging Studies, San Antonio, USA, ³University of Michigan, USA</i>	O45 Epigenetic alterations in skeletal muscle metabolism are associated with weight loss resistance B. Beauchamp* ¹ , S. Ghosh ² , A. Chu ¹ , A. Blais ¹ , K. Rajamanickam ³ , E. Tsai ³ , M.E. Patti ⁴ , M.E. Harper ¹ , ¹ <i>University of Ottawa, Canada, ²North Carolina Central University, USA, ³Ottawa Hospital Research Institute, Canada, ⁴Harvard Medical School, USA</i>
16:45 – 17:00	O46 Distribution of Fe(III) in carotid atherosclerotic plaques and its relation to vulnerability for rupture H. Gustafsson*, M. Norell, M. Hallbäck, M. Lindgren, M. Engström, H. Zachrisson, <i>Linköping University, Sweden</i>	O47 Role of Nrf2 in neuroblastoma sensitivity to Bortezomib A.L. Furfaro* ¹ , S. Piras ¹ , M. Passalacqua ¹ , C. Domenicotti ¹ , M.A. Pronzato ¹ , U.M. Marinari ¹ , L. Moretta ² , N. Traverso ¹ , M. Nitti ¹ , ¹ <i>University of Genoa, Italy, ²Giannina Gaslini Institute, Italy</i>	O48 Histone methylation is regulated by nitric oxide J.R. Hickok, D. Vasudevan, D.D. Thomas*, <i>University of Illinois at Chicago, USA</i>
17:00 – 18:30	Drinks with Poster Presentations (Queens Tower Room & Huxley Building 344)		SFRR-Europe AGM (17:00 – 18:00) Great Hall
18:30 – 19:30	IUBMB Jubilee Lecture (Introduced by Jose Vina, Universidad de Valencia, Spain) Nutrient Sensing Pathways and Ageing Prof. Dame Linda Partridge, FRS, University College London, UK and Max Planck Institut, Köln, Germany Room: Great Hall		

Saturday, 8 September 2012			
07:30	Conference Registration Open		
08:30 – 10:30	Symposium 9 - Selenium, Selenoproteins and Type 2 Diabetes: An Unexpected Link	Symposium 10 - Reactive Nitrogen Species and Reactive Oxygen Species in Cardiac Myocyte Signal Transduction	
	Room: Great Hall `	Room: Clore	
08:30 – 08:35	Introduction Chairs – Prof. Regina Brigelius-Flohe, German Institute of Human Nutrition, Germany and Dr. Holger Steinbrenner, Universität- Düsseldorf, Germany	Introduction Chairs – Prof. Thomas Michel, Harvard Medical Hospital, Boston, USA and Prof. Ajay Shah, King’s College London, UK	
08:35 – 09:00	Epidemiology of selenium and type 2 diabetes - Margaret Rayman, University of Surrey, UK	Hydrogen peroxide and differential activation of nitric oxide synthases in cardiac myocytes - Thomas Michel, Harvard Medical Hospital, USA	
09:00 – 09:25	Selenium and diabetes - evidence from animal studies - Xingen Lei, Cornell University, USA	In vivo dissection of redox-regulated protein kinase activation in the heart - Philip Eaton, St Thomas’ Hospital London, UK	
09:25 – 09:50	Interference of selenium with the carbohydrate metabolism - Holger Steinbrenner, University of Düsseldorf, Germany	Stretch-induced Nox2-dependent signal transduction in muscle – Chris Ward, University of Maryland, Baltimore, USA	
09:50 - 10:15	Endoplasmic reticulum-localized selenoproteins in insulin resistance - Vadim Gladyshev, Brigham & Women's Hospital, USA	NADPH oxidase-dependent regulation of cardiac stress responses - Ajay Shah, King’s College London, UK	
10:15 – 10:30	Closing comments for Symposium 9		Closing comments for Symposium 10
10:30 – 11:00	Refreshment Break - Queens Tower Room & Huxley Building 344		
11:00 – 13:00	Symposium 11 - Protein Oxidation, Proteolysis, and Ageing	Symposium 12 – The conversion of Redox Signals into Highly Specific Zinc Ion Signals	
	Room: Great Hall `	Room: Clore	
11:00 – 11:05	Introduction Chairs – Prof. Kelvin J. A. Davies, University of Southern California, Los Angeles, USA and Prof. Michael Davies, The Heart Research Institute, Australia	Introduction Chairs – Prof. Wolfgang Maret, King’s College London, UK and Prof. Christer Hogstrand, King’s College London, UK	
11:05 – 11:30	Protein Oxidation and Proteolytic Susceptibility - Michael Davies, The Heart Research Institute, Australia	Redox/zinc signal transduction in ischemic preconditioning and neuronal cell death - Elias Aizenman, University of Pittsburgh, USA	
11:30 – 11:55	Proteasomal regulation in oxidative stress and ageing - Tilman Grune, University of Jena, Germany	Nitric oxide and zinc-mediated protein assembly in opioid receptor signaling - Javier N. Garzon, Instituto Cajal, Spain	
11:55 – 12:20	Impairment of proteasome function as a biomarker of cellular and tissular ageing – Bertrand Friguet, Université Pierre et Marie Curie, France	Zinc ions as effectors of environmental oxidative lung damage - James M. Samet, University of North Carolina, USA	
12:20 – 12:45	Ageing and immunoproteasome: More than just antigen presentation - Deborah Ferrington, University of Minnesota, USA	Redox biochemistry of metallothioneins and protein tyrosine phosphatases in growth factor signalling - Wolfgang Maret, King’s College London, UK	
12:45 – 13:00	Closing comments for Symposium 11		Closing comments for Symposium 12
13:00 – 14:00	Lunch with Poster Presentations - Queens Tower Room & Huxley Building 344		
		13:00 – 14:00	SFRR Asia Business Meeting Salc 1
14:00 – 14:50	Informa Award Lecture (Introduced by Helen Griffiths, University of Aston, UK) NADPH Oxidases as Mediators of Vascular Physiology Prof. Kathy Griendling, Emory University School of Medicine, Atlanta, USA Room: Great Hall		
15:00 – 17:00	Neuroscience and Nitric Oxide Oral Presentations Co-Chairs: Shinya Toyokuni (Japan) Aldini Giancarlo (Italy)	Oxidation of Macromolecules Oral Presentations Co-Chairs: Maria Fedorova (Germany) Lin Mantell (USA)	Cardiovascular, Metabolic & Environmental Disorders II Oral Presentations Co-Chairs: Alison Brewer (UK) Mariapaola Nitti (Italy)
	Room: Great Hall	Room: Clore	Room: Huxley 308
15:00 – 15:15	O49 Tyrosine modification of b2-tubulin and its potential nitric oxide signaling in cardiomyogenesis Y.S. Park ¹ , S.K. Kang ¹ , Y.G. Kwon ⁴ , K.P. Kim ² , I. Komuro ³ , S.I. Park ^{*1} , ¹ Korea National Institute of Health, Republic of Korea, ² Konkuk University, Republic of Korea, ³ Chiba University, Japan, ⁴ Yonsei University, Republic of Korea	O50 Generation and Accumulation of Cellular 5-Hydroxymethylcytosine by redox-active quinones B-Z. Zhu, <i>Research Center for Eco-Environmental Sciences, Chinese Academy of Sciences, China</i>	O51 Transforming growth factor-β1 modulates nrf2 redox signalling and enhances migration of human aortic adventitial fibroblasts T. Mughal*, M. Parsons, R.C. Siow, <i>King's College London, UK</i>
15:15 – 15:30	O52 Nitric oxide metabolism plays a crucial role in visual pattern memory in Drosophila C. CHEN ^{*1} , L. LIU ² , Y. LIU ² , Q.L. HOU ¹ , H.Q. JIANG ² , X. ZHANG ¹ , ¹ National Laboratory of Biomacromolecules, China, ² Chinese Academy of Sciences, China	O53 Yeast 20S proteasome redox forms generate diverse peptide sets from same protein substrates M. Demasi ^{*1} , V. Simoes ¹ , G.M. Silva ^{1,2} , F.C. Gozzo ³ , L.E.S. Netto ² , ¹ Instituto Butantan, Brazil, ² USP, Brazil, ³ UNICAMP, Brazil	O54 Heme oxygenase-1 regulates mitochondrial coenzyme Q and reactive oxygen species formation – possible implications for the metabolic reprogramming in response to hypoxia E.J. Collinson ¹ , K.H. Chan ² , G.J. Maghzal ¹ , J. Cantley ³ , C. Suarna ¹ , L. Dunn ² , J. Ni ¹ , R.G. Midwinter ¹ , H.A. Hamid ¹ , D.L. Newington ¹ , Y.T. Lam ² , D.E. James ³ ,

			C.F. Clarke ⁴ , M.K.C. Ng ² , R. Stocker* ¹ , ¹ University of Sydney, Australia, ² The Heart Research Institute, Australia, ³ Garvan Institute of Medical Research, Australia, ⁴ University of California, USA
15:30 – 15:45	O55 Antioxidant defense systems in the human parasite <i>Giardia intestinalis</i> D. Mastronicola* ¹ , F. Testa ² , E. Forte ² , M. Falabella ² , P. Sarti ^{1,2} , A. Giuffrè ¹ , ¹ CNR Institute of Molecular Biology and Pathology, Italy, ² Sapienza University of Rome, Italy	O56 Decreased expression and increased carbonylation of Haptoglobin in plasma from MCI and AD subjects: role of extracellular chaperones in Alzheimer disease A. Cocciolo ¹ , P. Mecocci ² , D.A. Butterfield ³ , M. Perluigi* ¹ , ¹ Sapienza University of Rome, Italy, ² University of Perugia, Italy, ³ University of Kentucky, USA	O57 Mechanical stretch-mediated HO-1 upregulation in human mesangial cells: a role for Nrf2 in redox regulation? L. Gnudi*, A. Hayward, S. Duggan, K. Price, J. Pan, C. Dessapt, R.C.M. Siow, G.E. Mann, King's College London, UK
15:45 – 16:00	O58 Pepsin is nitrated in the stomach acquiring anti-ulcerogenic activity: a novel nitrating pathway involving dietary nitrite, gut microbiota and gastric proteins B.S. Rocha* ¹ , B. Gago ¹ , R.M. Barbosa ¹ , J.O. Lundberg ² , R. Radi ³ , J. Laranjinha ¹ , ¹ University of Coimbra, Portugal, ² Karolinska Institute, Sweden, ³ Universidad de la Republica, Uruguay	O59 Fluorescence Detection Method for Lipid-derived Radical K. Yamada*, F. Mito, Y. Matsuoka, T. Yamasaki, K. Kitagawa, M. Yamato, Kyushu University, Japan	O60 Diabetes can diminish benefits of free radical scavenging potential of polyphenols in blood J.B. Xiao* ¹ , Y.X. Xie ² , H. Cao ² , X.Q. Chen ² , ¹ Shanghai Normal University, China, ² Central South University, China
16:00 – 16:15	O61 A carbon monoxide-sensitive hydrogen sulfide cascade mediates acute hypoxic regulation of the cerebral microcirculation and metabolism M. Kajimura* ^{1,2} , T. Morikawa ¹ , Y. Yukutake ¹ , M. Suematsu ^{1,2} , ¹ Keio University, Japan, ² JST, Japan	O62 Capturing and quantifying reversibly oxidised cysteines in the myocardium by thiol-disulfide exchange J. Paulech*, N. Solis, K.A. Liddy, M. Puckeridge, M.Y. White, S.J. Cordwell, The University of Sydney, Australia	O63 A novel role of myeloperoxidase in the induction of endoplasmic reticulum (ER) stress A. Forsman Quigley ¹ , F.A. Summers ¹ , T.J. Barrett ^{1,2} , C.A. Bursill ^{1,2} , C.L. Hawkins* ^{1,2} , ¹ Heart Research Institute, Australia, ² University of Sydney, Australia
16:15 – 16:30	O64 Biliverdin Reductase-A: a novel drug target for atorvastatin in a dog preclinical model of Alzheimer disease E. Barone* ^{1,2} , E. Head ² , D.A. Butterfield ² , ¹ Swiss Federal Institute of Technology, Switzerland, ² University of Kentucky, USA	O65 Measurement of serum autoantibodies against oxidatively modified autoantigens in human autoimmune diseases P.G. Winyard* ¹ , A. Nissim ² , B. Ryan ³ , M. Whiteman ¹ , P. Eggleton ¹ , ¹ University of Exeter, UK, ² Queen Mary University of London, UK, ³ University of Oxford, UK	O66 Myeloperoxidase levels and cellular stress response after explosive-type of moderate resistance training in the elderly R.M. Beltran Valls ¹ , I. Dimauro ¹ , A. Brunelli ¹ , P. Caserotti ² , A. Parisi ¹ , D. Caporossi* ¹ , ¹ University of Rome "Foro Italico", Italy, ² University of Southern Denmark, Denmark
16:30 – 16:45	O67 Dynamic and complex redox-dependent modifications of DJ-1 in cardiac cells and tissue during oxidative stress M. Fernandez-Caggiano* ¹ , E. Schroder ² , P. Eaton ² , ¹ INIBIC. CHU A Coruña, Spain, ² King's College London, ² Cardiovascular Division. St Thomas' Hospital, UK	O68 Effect of annatto-tocotrienols supplementation on the Development of Mammary Tumors in HER-2/neu Transgenic Mice E. Pierpaoli, V. Viola, A. Barucca, F. Orlando, F. Galli, M. Provinciali, S. Legnaioli*, University of Perugia, Italy	O69 Increased organ levels of angiotensin II in ren2 rats leads to the formation of reactive oxygen species and DNA damage G. Fazeli*, H. Stopper, S. Weissenberger, C. Makiol, A. Heidland, N. Schupp, University of Würzburg, Germany
16:45 – 17:00	O70 Nitric oxide dynamics and dependent neurovascular coupling in a triple-transgenic mouse model of Alzheimer disease C.F. Lourenço* ¹ , R.M. Barbosa ^{1,2} , E. Cadenas ³ , R. Radi ⁴ , J. Laranjinha ^{1,2} , ¹ Center for Neuroscience and Cell Biology, Portugal, ² University of Coimbra, Portugal, ³ University of Southern California, Los Angeles, USA, ⁴ Universidad de la Republica, Uruguay	O71 Soluble mediators from activated leukocytes cause oxidative DNA damage in adjacent cells N. Schupp* ¹ , Z. Schmidt ¹ , N. Queisser ¹ , S. Sela ² , ¹ University of Würzburg, Germany, ² Western Galilee Hospital, Israel	O72 Dietary quercetin improves endothelial function and protects against atherosclerosis in ApoE knockout mice fed a high-fat diet Y. Shen ^{1,3} , N.C. Ward ¹ , J.M. Hodgson ¹ , Y. Wang ² , R. Stocker ² , K.D. Croft* ¹ , ¹ University of Western Australia, Australia, ² University of Sydney, Australia, ³ Nanjing University, Australia
17:00 – 18:30	Drinks with Poster Presentations (Queens Tower Room & Huxley Building 344)		SFRRI AGM Meeting (17:00 – 18:00) Great Hall
19:30 – 23:00	Gala Dinner(Optional event – entry by ticket found in delegate badge) The Grand Connaught Rooms, 61-65 Great Queen Street, London, WC2B 5DA <i>Delegates should make their own travel arrangements – nearest Underground station is Covent Garden / Holborn</i>		

Sunday, 9 September 2012			
07:30	Conference Registration Open		
08:15 – 08:25	Introduction to Catherine Pasquier Awards (Great Hall) Prof Nesrin Kartal-Ozer (President Elect SFRR Europe) Marmara University, Turkey Great Hall		
08:25 – 08:50	Catherine Pasquier Award Winners Lecture (Great Hall) Role of reactive oxygen species in degeneration in ageing muscle Dr Aphrodite Vasilaki, University of Liverpool, UK		
08:50 – 09:15	Catherine Pasquier Award Winners Lecture (Great Hall) Free Radical biology for medicine: learning from liver disease Dr Gaetano Serviddio, Università di Foggia, Italy		
09:25 – 11:25	Symposium 13 - Free Radicals and Exercise: Where Next After Antioxidants	Symposium 14 - Inflammation and Neurodegeneration. Sponsored by: 	
	Room: Great Hall	Room: Huxley 308 and via video link to Huxley 311	
09:25 – 09:30	Introduction Chairs - Prof. Malcolm Jackson, University of Liverpool, UK and Prof. Michael Reid, University of Kentucky, USA	Introduction Chairs – Prof. Catarina Oliveira, University of Coimbra, Portugal and Prof. Guy Brown, University of Cambridge, UK	
09:30 – 09:55	The roles of reactive oxygen and nitrogen species in muscle fatigue - Hakan Westerblad, Karolinska Institut, Sweden	Prognostic biomarkers of oxidative stress in Alzheimer's Disease - Allan Butterfield, University of Kentucky, USA	
09:55 – 10:20	Adaptations in mitochondria to exercise training; the role of free radicals - Jose Viña, Universidad de Valencia, Spain	Neurovascular and metabolic coupling: diffusible bridging supported by nitric oxide - João Laranjinha, University of Coimbra, Portugal	
10:20 – 10:45	Inflammation and muscle dysfunction: Role of redox signaling - Michael Reid, University of Kentucky, Lexington, USA	S-nitrosothiols in neurodegeneration - Stuart Lipton, Sanford-Burnham Medical Research Institute, USA	
10:45 – 11:10	Nitrate/nitrite supplementation, mitochondrial efficiency and exercise capacity - Eddie Weitzberg, Karolinska Institut, Sweden	Reactive oxygen and nitrogen species in inflammatory neurodegeneration – Guy C. Brown, University of Cambridge, UK	
11:10 – 11:25	Closing comments for Symposium 13	Closing comments for Symposium 14	
11:25 – 11:55	Refreshment Break – Queens Tower Room & Huxley 344		
11:55 – 13:55	Symposium 15 - Autophagy and Oxidative Stress in Health and Disease	Symposium 16 - Glutathione: A Role in Redox Signaling, Ageing and Disease– sponsored by: 	
	Room: Great Hall	Room: Huxley 308 and via video link to Huxley 311	
11:55 – 12:00	Introduction Chairs – Dr. Jianhua Zhang, University of Alabama, USA and Dr. Bradford Hill, University of Louisville, US	Introduction Chairs – Prof. Federico Pallardo, Universidad de Valencia, Spain and Prof. Brian Day, Denver, USA	
12:00 – 12:25	Autophagic response to bioenergetic and oxidative stress - Jianhua Zhang, University of Alabama, USA	12:00 – 12:20	Epigenetics and role of glutathione in redox regulation Federico V. Pallardó, Universidad de Valencia, Spain
12:25 – 12:50	Autophagy - a guardian against neurodegeneration - David Rubinsztein, University of Cambridge, UK	12:20 – 12:40	Glutathione in ageing Brian Day, University of Colorado, USA
12:50 – 13:15	Implications of autophagy for the smooth muscle cell - Bradford Hill, University of Louisville, USA	12:40 – 13:00	Nuclear glutathione and the cell cycle in plants Christien Foyer, University of Leeds, UK
13:15 – 13:40	Roles of Sequestosome1/p62 in prevention of obesity, hypertension and atherosclerosis - Tetsuro Ishii, University of Tsukuba, Japan	13:00 – 13:20	Glutathione in plant biotic interactions Alain Puppo, Université Nice, France
		13:20 – 13:40	Compensatory gene expression in glutathione deficient mice: implications for ageing and disease susceptibility Terrance J. Kavanagh, University of Washington, USA
13:40 – 13:55	Closing comments for Symposium 15	Closing comments for Symposium 16
