### **Preface**

The 2nd Workshop on Popularize Artificial Intelligence (PAI 2013) follows the successful experience of the 1st edition, held in Rome 2012 to celebrate the 100th anniversary of Alan Turing's birth. It is organized as part of the XIII Conference of the Italian Association for Artificial Intelligence (AI\*IA), to celebrate another important event, namely the 25th anniversary of AI\*IA.

In the same spirit of the first edition, PAI 2013 aims at divulging the practical uses of Artificial Intelligence among researchers, practitioners, teachers and students. 13 contributions were submitted, and accepted after a reviewing process that produced from 2 to 3 reviews per paper. Papers have been grouped into three main categories: student experiences inside AI courses (8 contributions), research and academic experiences (4 contributions), and industrial experiences (1 contribution). They cover a wide range of AI techniques, from robotics and clustering to declarative problem solving and logic-based approaches, as wide as the range of application areas, from RoboCup to (video)games, ambient assisted living, healthcare, geology, mobile technologies and vision.

In accordance to the content of the papers and their reviews, the Program Committee and the Workshop Organisers awarded a *Best Paper Award* to:

AngryHEX: an Artificial Player for Angry Birds Based on Declarative Knowledge Bases, by Francesco Calimeri, Michael Fink, Stefano Germano, Giovambattista Ianni, Christoph Redl, and Anton Wimmer.

The Organising Committee warmly thanks the authors and the members of the Program Committee for their scientific contribution, as well as the organizers of the XIII Conference of AI\*IA and AI\*IA itself for the provided support.

December 1, 2013

# Contents

Preface	3
Industrial and Research/Academic Experiences	
RoboCup@Sapienza Daniele Nardi, Luca Iocchi, and Luigia Carlucci Aiello	7
LPAD-based Fall Risk Assessment Luca Cattelani, Pierpaolo Palumbo, Federico Chesani, Luca Palmerini, and Lorenzo Chiari	15
VEGA-QSAR: AI inside a platform for predictive toxicology  Emilio Benfenati, Alberto Manganaro and Giuseppina Gini	21
AngryHEX: an Artificial Player for Angry Birds Based on Declarative Knowledge Bases Francesco Calimeri, Michael Fink, Stefano Germano, Giovambattista Ianni, Christoph Redl, and Anton Wimmer	29
Automated Landslide Monitoring through a Low-Cost Stereo Vision System  Mauro Antonello, Fabio Gabrieli, Simonetta Cola, and Emanuele Menegatti	37
Student Experiences Inside AI Courses  "Ago Vs Othello": An artificial intelligence agent playing Reversi  Jacopo Festa, Stanislao Davino	43
CME: A Tool for Designing Business Models based on Commitment Patterns Stefano Lanza, Simone Vallana, and Cristina Baroglio	51
Smart usage of Mobile Phones Sensors within an Event Calculus Engine Valerio Mazza and Michele Solimando	59
Emerging Stable Configurations in Cellular Automata Mattia Vinci and Roberto Micalizio	67
di4g: Uno Strumento di Clustering per l'Analisi Integrata di Dati Geologici Alice Piva, Giacomo Gamberoni, Denis Ferraretti, and Evelina Lamma	73
Answer Set Programming and Declarative Problem Solving in Game AIs  Davide Fuscà, Stefano Germano, Jessica Zangari, Francesco Calimeri, and Simona Perri	81
Towards smart robots: rock-paper-scissors gaming versus human players  Gabriele Pozzato, Stefano Michieletto, and Emanuele Menegatti	89
