

Experimental investigation of the fallout dynamics of microplastic fragments in wind tunnel: the BURNIA agenda

Matteo M. Musso, Frank Harms, Massimo Martina, Elke K. Fischer, Bernd Leitl, Silvia Trini Castelli

SUPPLEMENTARY MATERIAL

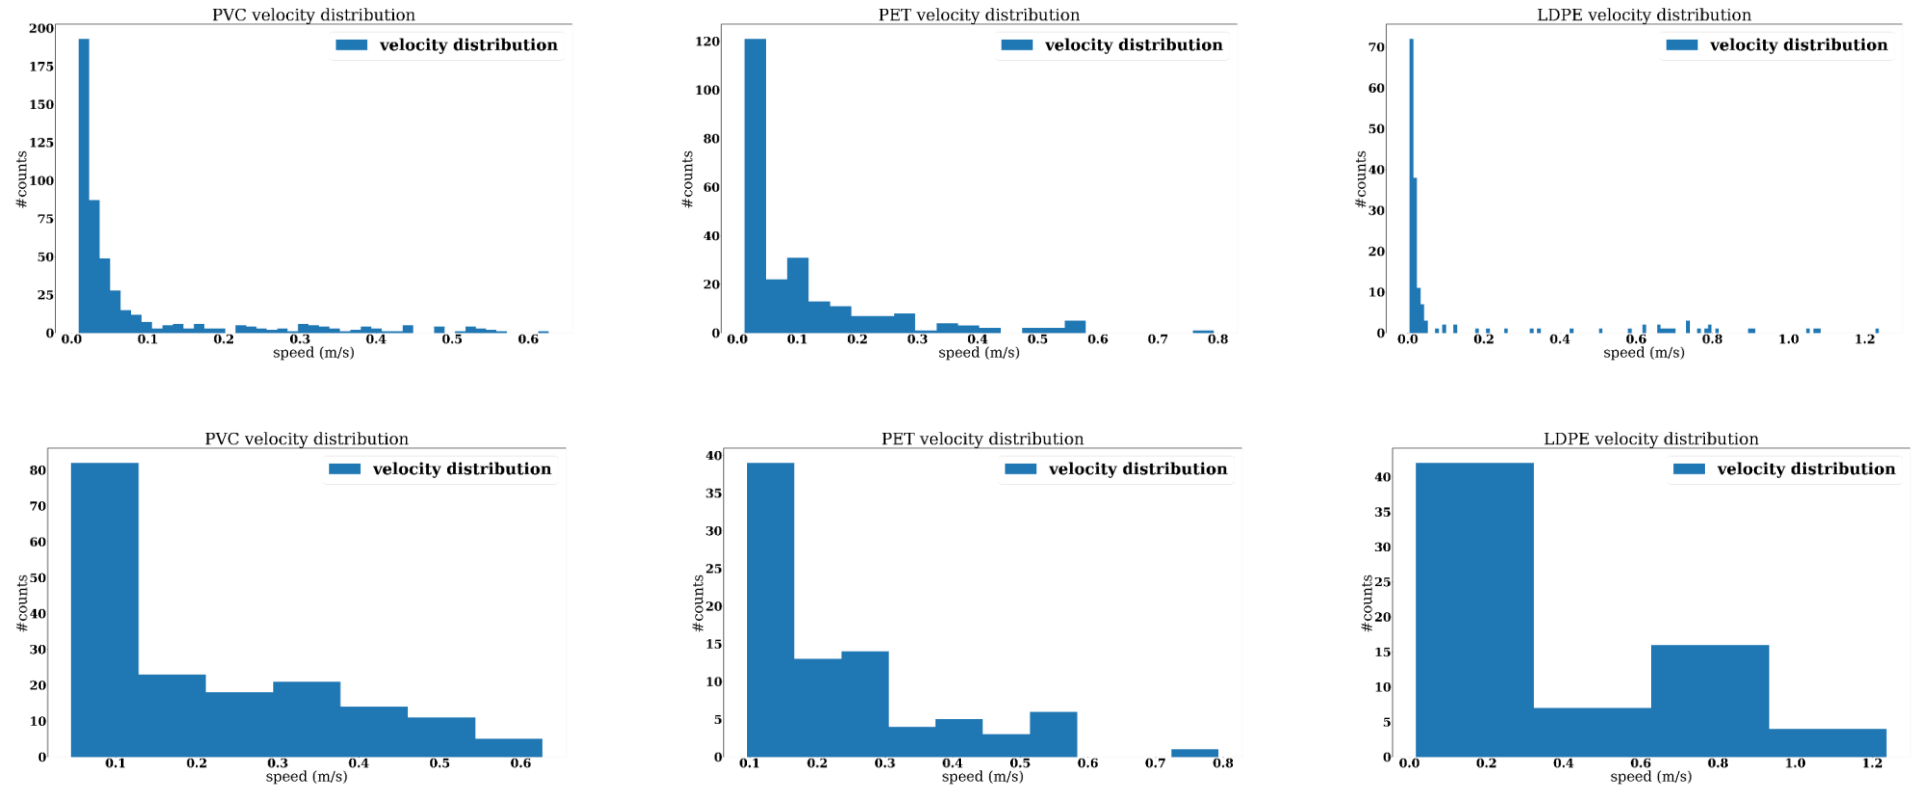

Figure SM1. Histograms of the settling velocity distribution for the $n^{\text{th}} = 70^{\text{th}}$ (top) and the $n^{\text{th}} = 90^{\text{th}}$ (bottom) percentile thresholds for PVC (left), PET (centre) and LDPE (right) fragments.
