The periglacial environments

- Extreme environmental conditions
- Relict surfaces
- Cryogenic processes
- Periglacial features (blockstreams, blockfields, tilted stones, sorted circles, etc..)

The Stolenberg Plateau

Preliminary investigation

- 2017: cableway construction
- Geosite delimitation and preservation
- Periglacial features description
- Soil trenches (2-10 m)

Alpine Tundra: snowbed sites soil $\delta^{13}\text{C}$

- 7 permanent snowbed sites (*Salicetum herbaceae* association)
- Elevation: 2686 – 2850 m a.s.l.
- Climatic, pedoclimatic variables
- Soil C and N forms
- Vegetation and phenology monitoring
- Topsoil $\delta^{13}\text{C}$
