

Sixth International Conference organized by SMAI-AFA

CURVES AND SURFACES

June 29th
July 5th , 2006

Avignon (France)

Résumés

Sixth International Conference
Organized by "SMAI – AFA" on
Curves and Surfaces

Résumés

Avignon, France
June 29 - July 5, 2006

Acknowledgments

This conference is organized by “Association Française d’Approximation” (AFA),
an activity group of “Société de Mathématiques Appliquées et Industrielles” (SMAI),

in collaboration with the following institutions:

- Université Joseph Fourier (Grenoble I),
- Institut National des Sciences Appliquées (INSA) de Rennes,
- Université Pierre et Marie Curie (Paris VI),
- Université de Rennes I,
- Ecole Nationale Supérieure des Arts et Métiers (ENSAM) de Lille,
- Université de Valenciennes et du Hainaut-Cambrésis,
- Université de la Méditerranée, Marseille,

with the help of:

- Gudrun Albrecht, Université de Valenciennes,
- Marc Daniel, LSIS, Université de la Méditerranée, Marseille,
- Pascal Frey, Université Pierre et Marie Curie, Paris,
- Olivier Gibaru, ENSAM, Lille,
- Yvon Lafranche, Université de Rennes 1,
- Marie-Laurence Mazure, Université Joseph Fourier, Grenoble,
- Eric Nyiri, ENSAM, Lille,
- Paul Sablonnière, INSA, Rennes,

with financial support from:

- European Office of Aerospace Research and Development, Air Force Office of Scientific Research, United States Air Force Research Laboratory,
- Institut National des Sciences Appliquées de Rennes,
- Laboratoire des Sciences de l’Information et des Systèmes à Marseille,
- Center of Mathematics for Applications (CMA) at University of Oslo (Norway),
- Délégation Générale pour l’Armement,
- Région Provence-Alpes-Côte d’Azur,
- Université Joseph Fourier, Grenoble,
- Institut d’Informatique et de Mathématiques Appliquées de Grenoble (IMAG),
- Institut National Polytechnique de Grenoble (INPG).

We wish to thank all of them for their contribution to the success of this conference.

The organizers:

PATRICK CHENIN, Université Joseph Fourier, Grenoble, France,
ALBERT COHEN, Université Pierre et Marie Curie, Paris, France,
TOM LYCHE, University of Oslo, Norway,
JEAN-LOUIS MERRIEN, Institut National des Sciences Appliquées de Rennes, France,
LARRY L. SCHUMAKER, Vanderbilt University, Nashville, USA.

CONTENTS

→ The following list is ordered alphabetically according to the name of the speaker.

Fitting a Shape from a Manifold to Unorganized Data M. Aigner* , B. Jüttler	1	A Formula for the Error of Finite Sinc-interpolation over a Fixed Finite Interval J.-P. Berrut	7
Virtual Discrete Willmore Energy as a Tool for Mesh Optimisation L. Alboul* , W. Brink , M. Rodrigues	1	Multiresolution Modeling with Non-uniform B-Spline Surfaces M. Bertram	7
Extraction of Geometric Invariants for Parametric Quadric Triangles G. Albrecht	2	Adaptive Surface Fitting to Point Clouds P. Binev	8
Monotonic ENO Interpolants F. Aràndiga	2	Classification : a Survey of Some Recent Advances S. Boucheron* , A. Tsybakov , N. Vayatis	8
Artifact Analysis on Ternary Schemes and Schemes of Higher Arity U.H. Augsdörfer* , N.A. Dodgson , M.A. Sabin	2	Div-free Minimizing Splines with Tension M.N. Benbourhim , A. Bouhamidi*	9
Polyharmonic Wavelets Based on Lagrangean Functions B. Bacchelli* , M. Bozzini , C. Rabut	3	On Conformal Mappings of Spherical Domains with the Minimum Distortion L. Bourchtein , A. Bourchtein*	9
On a Class of Discrete Quasi-interpolants with Good Error Constants D. Barrera Rosillo* , M. J. Ibáñez Pérez	3	Manifold Learning O. Bousquet	10
Bézier Clipping Via Degree Reduction M. Bartoň* , B. Jüttler	4	The PageRank Vector for Web Search C. Brezinski* , M. Redivo-Zaglia	10
Preconditioning Radial Basis Function Interpolation Problems using Mean Value Coordinates R.K. Beatson* , O. Davydov , J. Levesley	4	The Configurations of Two Real Projective Quadrics E. Briand	10
On the Approximation Order of Tangent Estimators G. Albrecht , J.P. Bécar* , G. Farin , D. Hansford	4	Generalized Multidimensional Scaling A. M. Bronstein , M. M. Bronstein* , R. Kimmel	10
A Vector Outline Descriptor using Interpolatory Subdivision Curves C. Beccari* , G. Casciola , L. Romani	5	Virtual Conceptual Design Parametrics for Supporting Sketching of Shapes and Mechanisms G. Brunetti	11
Semi-Cardinal Interpolation with Multivariate Polysplines A. Bejancu	5	Efficient Thinning for Skeleton Based Mesh Applications G. Brunnett* , D. Brunner	12
Barycentric Coordinates and Elliptic Interpolation A. Belyaev	6	Reconstruction of Images by PDE-Driven Interpolation B. Burgeth* , J. Weickert , H. Dell	12
Discrete Curvature Traits of Developable Surfaces A. Benton	6	Compressive Sampling E. J. Candes	12
Non Linear Spline Interpolation by a Polygonal Based Construction M. Bercovier* , R. Goldenthal	6	Interactive Sculpting with Virtual Clay M.-P. Cani	13

Geometric Characterization of Configurations with Defect Three J. M. Carnicer* , C. Godés	13	On the Convergence of the Cascade Algorithm G. B. Dongmo	19
A Mixed (Numerical and Symbolic) Method for Sectioning Offsets F. Carreras* , L. Gonzalez-Vega , J. Puig-Pey	14	Constructing Polynomial Surfaces from Pregeodesic Curves J. Sánchez-Reyes , R. Dorado* , M. Paluszny	19
Prediction Methods Based on Positive Definite Functions W. zu Castell	14	Minimum Spanning Circles/spheres of Points, Curves, and Surfaces M. Ramanathan , G. Elber* , G. Barequet , M. Soo Kim	20
Optimal Parameterizations for Conic Sections G. Albrecht , I. Cattiaux-Huillard* , V. Hernandez-Mederos	14	Rational Cubics with Circular Precision G. Farin	20
A Rapid Iterative Method for Pole Surface Fitting J. C. Chambelland* , M. Daniel	15	Scattered Data Approximation Via Iterated Moving Least Squares G. E. Fasshauer	20
Biquadratic Sampling Method for Intersection of Surfaces S. Chau* , A. Galligo , J.P. Pavone	15	Topology Adaption for Dual Evolution R. Feichtinger* , H. Yang , B. Jüttler	21
High-level Shape Manipulations in Industrial Design V. Cheutet* , J.C. Leon , J.P. Pernot , B. Falcidieno , F. Giannini	16	Chain Rules for Divided Differences M. S. Floater* , T. Lyche	21
Minimal Paths and Fast Marching Methods for Surface Segmentation and Meshing L. Cohen* , R. Ardon	16	Surface Reconstruction P.L. George	21
Full Rank Interpolatory Subdivision Schemes C. Conti , M. Cotronei* , T. Sauer	16	Shapes of Bézier Curves G. H. Georgiev	22
Analysis of Some Non-linear Interpolatory Subdivision Schemes and Associated Multi-resolutions S. Amat , K. Dadourian* , J. Liandrat	17	Approximation of Linear Quadratic Control Systems With B-Spline Using Flatness O. Gibaru* , P. Auquiart , W. Perruquetti	22
Universal Algorithms for Machine Learning A. Barron , A. Cohen , W. Dahmen* , R. DeVore	17	Loop Subdivision with Curvature Control I. Ginkel* , G. Umlauf	23
Fitting Scattered Data on Manifolds Using Radial Basis Functions and Projected Bivariate Splines O. Davydov	18	A Simple Class of Nonlinear Subdivision Schemes S. Schaefer , E. Vouga , R. Goldman*	23
Image Coding with Anisotropic Wavelets D. Alani , A. Averbuch , S. Dekel*	18	Fault Reconstruction on 3D Geophysical Datasets A. Travert , C. Gout* , C. Le Guyader , M. Helbling	23
Trivariate Quadratic Spline Quasi-interpolants and Applications to Numerical Integration V. Demichelis* , P. Sablonnière	18	Multiresolution Solvers for Physical Simulation E. Grinspun	24
Discrete Harmonic Forms for Surface Tiling and Parameterization M. Desbrun	19	On Surface Curvature Approximations from a Triangle Mesh F. Guibault* , M.-G. Vallet , J. Dompierre	24
Greedy Algorithms and Learning Theory A. Barron , A. Cohen , W. Dahmen , R. DeVore*	19	Using Dual Quaternions to Describe Ruled Surfaces G. Guillard* , C. Hamitouche , C. Roux	25
		Thin Plate Spline Approximation in the Disc T. Hangelbroek	25

Anamorphic 3D Geometry D. Hansford* , D. Collins	26	Spline Quasi-interpolants with Boundary Conditions on Criss-cross Triangulations C. Dagnino , P. Lamberti*	32
Identification and Filtration of Images Based on the Velocity M. Hernandez* , L. Traversoni	26	Spline Techniques for Generating Surfaces with Practical Applications Including Numerical Simulation and Manufacturing K.-H. Brakhage , Ph. Lamby*	32
Sweeping Arrangements using Interval Arithmetic Y. Hijazi* , T. Breuel	26	Classical Polygonal Interpolation: A Unified Geometric Approach T. Langer* , A. Belyaev , H.-P. Seidel	33
Finite Element Methods with Linear B-Splines: Fast Assembly and Solution of Ritz-Galerkin Systems K. Höllig* , J. Hörner , M. Pfeil	27	Singularities of Parametric Surfaces of Bidegree (1, 2) A. Galligo , T. H. Lê*	33
Perfect Spatial Hashing S. Lefebvre , H. Hoppe*	27	Stationary Subdivision Schemes Reproducing Polynomials S. W. Choi , B.-G. Lee , Y. J. Lee* , J. Yoon	34
Multiscale Scattered Data Modelling by Radial Basis Functions A. Iske	27	Segmentation Under Constraints: a Survey M. Lefebvre* , D. Apprato , C. Gout , C. Le Guyader	35
On Cell Reducing Algorithm for Determining the Dimension of the Bivariate Spline Space $S_n^1(\Delta)$ G. Jaklič* , J. Kozak	28	Monotonicity Analysis and Sphere-Preserving Filters D. Kucеровsky , D. Lemire*	35
The Effect of Condition of Discrete Differential Multipoint Problem to the Selection of Tension Parameters I. Jelaska* , M. Rogina , S. Singer	28	Images Processing and Analysis for Mobile Terminals T. Lemlouma* , R. Elazouzi	36
Investigating the Curvature-sign Effect of a Control Point for Different Curve Representations A.I. Ginnis , E.I. Karousos , P.D. Kaklis*	29	Approximation with Broken Splines A. Iske , J. Levesley*	36
Guided Jet Subdivision K. Karčiauskas* , J. Peters	29	Modified Subdivision Surfaces with Continuous Curvature A. Levin	37
Towards Isometric Matching of Surfaces A. M. Bronstein , M. M. Bronstein , R. Kimmel*	29	Geometric Bending of Curves and Surfaces Y. Lipman	37
Mesh Pre-Processing for Modeling and Simulation L. P. Kobbelt	29	On Some Applications of Piecewise Conformal Approximation J. Lippus	37
Geometric Interpolation by Planar Cubic Polynomial Curves J. Kozak , M. Krajnc*	30	Curve Fairing Definition and Modelling L. Liu* , G. Dong	38
Offset Stable Blending and Trimming of Rational Surfaces R. Krasauskas	30	On Optimality of Pure Greedy Algorithm for Some Classes of Functions E. Livshitz	38
Controlled Local Deformation of NURBS Surfaces to Satisfy Several Punctual Constraints R. La Greca* , M. Daniel , A. Bac	31	Methods for Optimal Point Spacing when Interpolating B-Spline Curves P. S. Lockyer* , R.J. Cripps	39
Surface Meshing Along Curvature Lines J.-F. Lagüe	31	Real-Time GPU Rendering of Piecewise Algebraic Surfaces C. Loop	39

Hermite-Birkhoff Interpolation Employing Radial Basis Functions S. Lowitzsch*, J. Kaminski, G. Häusler	39	Spline Computations with the Control Polygon K. Mørken*, M. Reimers	47
On the High-Level Error Bound for Gaussian Interpolation L.-T. Luh	40	Polynomial Containment and Quasi-interpolation in Refinement Spaces D. Moubandjo	47
Interpolatory B-splines for Parametric Curve Design R. Zhang, W. Ma*	40	Computational Algebraic Geometry for Curves and Surfaces B. Mourrain	47
Smooth Spline Wavelets on the Sphere J. Maes*, A. Bultheel	41	Splines for Surfaces of Arbitrary Topology M. Neamtu	48
Optimal Bases of Spaces with Trigonometric Functions J. M. Carnicer, E. Mainar*, J. M. Peña	41	Geometry Processing for Isosurfaces G. Nielson	48
On Constrained Nonlinear Hermite Subdivision P. Costantini, C. Manni*	42	Local Data Interpolation with Bivariate and Trivariate Splines G. Nuernberger	48
High Smoothness Parametric B-splines I. Cravero, C. Manni*, M. L. Sampoli	42	C^k -Continuous Polynomial Spline L^1 Interpolation P. Auquiart, E. Nyiri*, O. Gibaru	48
About the Challenges of Surface Reconstruction Y. Gerard, T. Marzais*	43	On the Representation of Shapes Using Distance Transforms N. Paragios	49
Blossoms and Hermite Interpolation in Chebyshevian Spline Spaces with Connection Matrices A. Kayumov, M.-L. Mazure*	43	Analysis of Scalar Fields on Triangulated Surfaces S. Biasotti, G. Patané*, M. Spagnuolo, B. Falcidieno	49
Computation of Blob-like Structures Characteristic Scale with Wavelet Maxima Lines C. Damerval, S. Meignen*	44	Monotonicity-preserving Interproximation of B-H-curves C. Pechstein*, B. Jüttler	50
Exponentially Localized Polynomial Frames H. N. Mhaskar	45	Tensor Product Spline Surfaces with Shape Constraints P. Costantini, F. Pelosi*, M. L. Sampoli	50
Fractal Approximation of Functions in Some Metric Spaces and Lossy Image Compression Problem D. Y. Mitin*, N. A. Nazarenko	45	Boundary Surfaces of Moving Solids M. Peternell	51
Decomposition and Reconstruction Formulas Obtained by using the Linearization Coefficients of Jacobi Polynomials M. Moncayo	45	High Quality Surface Constructions J. Peters*, K. Karčiauskas	51
Computational Topology of Spline Curves by Subdivision: Counterexamples and Efficient Newton's Method E. L. Moore*, T. J. Peters	46	Exact and Heuristically Driven Geodesic Computations G. Peyré*, L. Cohen	51
Computational Aspects Arising in Surface Processing using PDEs S. Morigi	46	Locality Properties of RBF Expansion Coefficients. B. Fornberg, N. Flyer, S. Hovde, C. Piret*	52
Shape from Shading : Reconstruction using a B-spline Model F. Courteille, J.-D. Durou, G. Morin*	46	On Rational B-Spline Functions H. Gonska, D. Kacsó, P. Pişul*	52
		Harmonic 1-Forms on Surface Meshes K. Polthier	53

Surfaces for Architectural Design H. Pottmann	53	Triangular Spline Surfaces with Shape Constraints P. Costantini, F. Pelosi, M. L. Sampoli*	60
Biorthogonal Spline Wavelet Bases on the Interval M. Primbs	53	Geodesics on Manifolds: Theory, Computation, and Applications G. Sapiro	61
Local Basis Tensor Product Functions in Algebraic Numerical Grid Generation C. Conti, R. Morandi, C. Rabut*	54	Polynomial Interpolation in Several Variables T. Sauer	61
Analytical Approximation of Predetermined Geometrical Forms by Means of Graphic Representation of Transformed Classical Surfaces G.S. Rachkovskaya*, Yu.N. Kharabayev, N.S. Rachkovskaya	55	From B-Spline Mesh Generation to Effective Visualizations for the NIST Digital Library of Mathematical Functions B. Saunders*, Q. Wang	61
Constrained Free Form Deformation of NURBS Surfaces R. Raffin*, R. La Greca, G. Gesquière	55	Volume Preserving Multiresolution Meshes B. Sauvage*, S. Hahmann, G.-P. Bonneau	62
Reparametrization of Surfaces using PDE Methods A. F. Rasmussen	56	Edge-based Subdivision and the Construction of Smooth 1-form Bases P. Schröder	62
Shape Analysis of Subdivision Surfaces U. Reif	56	Intersection of Spline Curves using Knot Insertion K. Mørken, M. Reimers, C. Schulz*	63
Computing Multiple Zeros of Spline Functions K. Mørken, M. Reimers*	56	Symbolic and Approximate Parametrization of Real Curves J. R. Sendra	63
Approximation of Mobile Surfaces R. Resendiz Martinez*, S. Serrano Galvez	57	Local Spline Implicitization for Surfaces M. Shalaby*, B. Jüttler	63
Surface Parameterization by Quasi-harmonic Maps C. Rössl*, R. Zayer	57	Construction Methods for Curves and Surfaces with Rational Offsets Z. Šír*, B. Jüttler	64
L-CAMP: a New Wavelet Methodology Y. Hur, A. Ron*	57	The Spectral Basis and Rational Interpolation G. Sobczyk	64
Locally Supported Wavelets on the Sphere D. Roşca	58	Optimal Quasi-Interpolation by Quadratic Smooth Splines on Type-2 Triangulations T. Sorokina*, F. Zeilfelder	64
Subdivision Surfaces in CATIA V5 S. Rosel	58	A Manifold Based Construction of Smooth Surfaces Approximating a Curve Network R. Southern*, N.A. Dodgson	65
Polyharmonic Wavelets: a New Isotropic Construction M. Bozzini, C. Rabut, M. Rossini*	58	Sparse Grid Wavelets in Image Compression F. Müller, F. Sprengel*	65
Matching of Implicit and Parametric Surfaces M. Rumpf	59	Curves Reconstruction Thanks to Tangential Informations N. Sprynski*, B. Lacolle, L. Biard, D. David	66
