**Paediatric galenics:
a challenge and an opportunity
proposed by *A.P.P.A.*[®] Project for
Developing Countries**

Francesca Baratta

*Non-profit organization Aid Progress Pharmacist Agreement[®],
Turin, Italy*

*Department of Scienza e Tecnologia del Farmaco,
University of Turin, Italy*

Alma-Ata Declaration - 1978

*"... **the Primary Health Care...** forms an integral part both of the country's health system, of which it is the central function and main focus, and of the overall social and economic development of the community. It is the first level of contact... with the national health system, **bringing health care as close as possible to where people live and work, and constitutes the first element of a continuing health care service...**"*

TODAY?

2005

Problem to be addressed

Weak market control.

Inappropriate legal status of national medicine regulatory authorities to carry out their regulatory functions.

Inadequate legislation and regulations.

Weak quality control laboratories.

Inadequate regulation of clinical trials.

Inadequate import and export controls.

Existence of counterfeit products on national markets.

Local production firms non-compliant with GMP (ARVs, anti-malarial and anti-TB medicines).

2010

Assessment
of medicines regulatory systems
in sub-Saharan African countries
An overview of findings from 26 assessment reports

As a result, medicines regulation was not carried out to the full extent required to ensure the quality, efficacy and safety of medicines in African countries. The findings confirm the results of a 2004 questionnaire survey conducted by WHO in 38 African member states, which found that 90% of countries did not provide or enforce adequate regulatory functions

ACCESS TO HEALTH SERVICES: INEQUALITIES BETWEEN NORTH AND SOUTH OF THE WORLD

Countries with a critical shortage of health service providers
(doctors, nurses and midwives)

PROBLEMS RELATED TO THE LIFE STILE

«...water-borne diseases are not caused by lack of antibiotics but by **dirty water**, and by the political, social, and economic forces that fail to make clean water available to all; heart disease is caused not by a lack of coronary care units but by the **lives people lead**, which are shaped by the environments in which they live; obesity is not caused by moral failure on the part of individuals but by the excess availability of high-fat and high-sugar foods ...»

“Closing the gap in a generation: Health equity through action on the social determinants of health” – WHO Commission on Social Determinants of Health - 2008

Borana Singing wells, Kenya

Essential medicines are those that satisfy the priority health care needs of the population. They are selected with due regard to public health relevance, evidence on efficacy and safety, and comparative cost-effectiveness.

Essential medicines are intended to be available within the context of functioning health systems at all times in **adequate amounts**, in the **appropriate dosage forms**, with assured **quality** and adequate **information**, and at a **price** the individual and the community can afford.

BUT...

- More than **fifty percent of the population** in the Region **have no regular access to essential medicines.**
- **Medicine supply** and **regulatory systems** are weak
- **Financial** as well as **human resources** are inadequate to ensure delivery of pharmaceutical services and ensure access to essential medicines.
- Circulation of **poor quality medicines**, high medicine **prices**, unethical promotion and **irrational use** of medicines poses additional challenges.

COUNTERFEIT MEDICINES

A counterfeit medicine is one which is **deliberately and fraudulently mislabeled with respect to identity and/or source**. Counterfeiting can apply to both branded and generic products and counterfeit products may include products with the correct ingredients or with the wrong ingredients, without active ingredients, with insufficient active ingredients or with fake packaging.

WHO - General information on counterfeit medicines

“IMPERFECT” COUNTERFEITS

«these products contain the right components, with an incorrect concentration and/or formulation resulting in defective quality specifications. In the vast majority of cases, they are devoid of any therapeutic efficacy»

“CRIMINAL” COUNTERFEITS

«they are apparently similar to the original medicinal product, but do not contain any active ingredient and can even include harmful or toxic substances. They are usually sold at high prices and for the treatment of serious pathologies. Consequences for users of criminal counterfeits can be fatal»

COUNTERFEIT MEDICINES IN DC: ANALYSIS OF THE PHENOMENON

Analysis of 196 samples of medicinal products

F.Baratta, A. Germano, P. Brusa

Diffusion of counterfeit drugs in developing Countries and stability of galenics stored for months under different conditions of temperature and relative humidity

Croat Med J. 2012; 53: 173-184

FINAL DISTRIBUTION OF THE SAMPLES

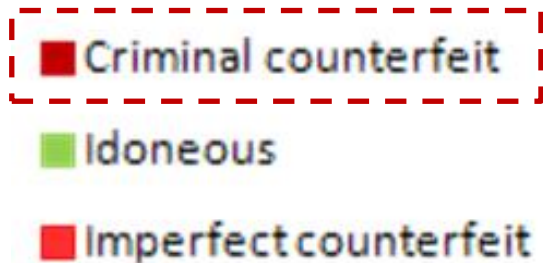

F.Baratta, A. Germano, P. Brusa

Diffusion of counterfeit drugs in developing countries and stability of galenics stored for months under different conditions of temperature and relative humidity

Croat Med J. 2012; 53: 173-184

CAMEROUN 2012

PHARMACEUTICAL FORMS TESTS (Ph Eur)

- Uniformity of content (2.9.6)
- Uniformity of mass (2.9.5)
- Disintegration (2.9.1)
- Friability (2.9.7)
- Hardness (2.9.8)
- Sterility (2.6.1)

CAMEROUN 2013

CAMEROUN 2013

- Population: 20 million
- Pharmacies on the national territory: 331
- Yaoundé+Douala: 81 pharmacies

**HOW MANY ARE THE
STREET VENDORS?**

PRELIMINARY RESULTS:

- 1047 FAMILIES LIVING IN YAOUNDÉ: THE 99.6%, EVEN IF **SCHOOLED**, BUY MEDICINAL PRODUCTS BY STREET VENDORS
- THE 34% OF SUBJECTS IS **AWARE OF THE RISKS**. THE 60% BUY THESE PRODUCTS DUE TO **FINANCIAL DIFFICULTIES**
- 74 STREET VENDORS HAVE BEEN INTERVIEWED: THE 80% IS **MEDIUM-HIGH CULTURAL GRADE**

A.P.P.A.® PROJECT

PLANNING, CARRYING OUT, STARTING LABS IN ORDER TO PREPARE GALENIC MEDICINAL PRODUCTS AND RELATIVE QUALITY CONTROL IN DEVELOPING COUNTRIES

With the patronage of:

Università degli Studi di Torino

and

FEDERAZIONE ORDINI
FARMACISTI ITALIANI

ORDINE DEI FARMACISTI
PROVINCIA DI TORINO

federfarma piemonte

www.progettoappa.it

appa.onlus@unito.it

PHASES OF *A.P.P.A.*[®] PROJECT

Phase «zero»

Preliminary pharmaco-economic study which implies a trip of the *A.P.P.A.*[®] staff on site to value the local situation and recipient areas. Some medicines should be purchased in local pharmacies and sent to the laboratory of the University of Turin to value if these medicinal products, present on the local market, respect the declared characteristics or are counterfeit.

1

Choice of the place where building the galenic lab, choice of medicines needed and of the correct pharmaceutical forms, related to the local pathologies.

2

Stage in *A.P.P.A.*[®] lab of Turin, for a Pharmacy's student of Pharmacy Faculty of Turin; the stage leads to learn all the necessary to be able to prepare the programmed medicinal products.

3

A technician of the Country holding the lab comes to Italy to learn the procedures of galenic medicines in *A.P.P.A.*[®] lab of Turin, under a Pharmacy's student supervision. During this period the material needed for galenic lab will be sent to local partners.

4

Training period in the chosen Country, during which the local technician, who has been in Italy to learn galenic methods and procedures, will be coordinated in his work by the Pharmacy's student sent to the *A.P.P.A.*[®] lab .

5

Quality control of medicinal products routinely prepared in new galenic lab; moreover some sample of these are sent to University of Turin, Pharmacy Faculty, where they are tested to verify their quality.

6

Periodical stages at new lab for Pharmacy's students of Pharmacy Faculty of Turin are performed each year both to give a continuous supervision of medicinal products prepared in the lab and to create new formulations according to the requests of medical doctors responsible of the medical centers.

WHY GALENICS IN DC?

**USING LOCAL PERSONAL TEACHING THEM A JOB:
AUTONOMY**

**ALLOWING THE SALE OF CHEAP HIGH QUALITY
MEDICINES**

**AVOIDING THE PURCHASE OF MEDICINES
ILLEGALLY IMPORTED**

**CUSTOMIZING THE DOSAGES AND
PHARMACEUTICAL FORMS ACCORDING TO THE
ACTUAL NEEDS OF PATIENTS**

BASIC CONDITIONS FOR OPENING A LAB FOR THE PREPARATION OF GALENIC MEDICINAL PRODUCTS

- **HIGH PERCENTAGE OF COUNTERFEIT MEDICINES IN THE AREA**
- **LOCAL POOR AVAILABILITY OF QUALITY MEDICINES**
- **HIGH COST OF INDUSTRIAL MEDICINES**
- **APPROVAL OF LOCAL AUTHORITIES**

AIM

The project was born from the need and the desire to teach a trade to people leaving in Developing Countries and to ensure the production of safe and effective medicines

EASIER ACCESS TO MEDICINES

DECREASE MORTALITY

AFRICA: HIGH PRESENTS OF
COUNTERFEIT MEDICINES

NO THERAPEUTIC
EFFECT

CASES OF
INTOXICATION

ENDEMIC DISEASES IN THE AREA

- MALARIA
- SALMONELLA
- VENEREAL DISEASES
- HEPATITIS A,B,C,D,E,
- HIV
- TUBERCULOSIS
- OTHERS

CHOICE OF THERAPEUTIC CLASSES FOR THE GALENIC LAB

- ANTIMALARALS
- TOPICAL ANTIFUNGAL
- TOPICAL AND SYSTEMIC ANTIBIOTICS
- SYSTEMIC AND TOPICAL NSAD
- ANTIPIRETICS
- ANTIPARASITICS (antihelmintics, antiamebic, scabididi)
- DISINFECTANTS

STUDY AND FORMULATION OF ORAL LIQUID PAEDIATRIC FORMULATIONS: METHODOLOGICAL APPROACH

- ✓ In agreement with local medical doctors the **drugs** for the paediatric therapy are **chosen** and then **formulated: liquid oral** formulations are preferred and appropriate excipients are selected.
- ✓ For each formulation a **specific card** (written in **local language**) has been prepared. The card shows the procedure of preparation and the characteristics of each component present in the formulation.
- ✓ Each preparation has been tested to check its **quality** and its **stability** under different environmental conditions in accordance with the EMA guidelines.

PREPARATIONS PEDIATRIQUES

SIROPS

ACIDE ASCORBIQUE 10 mg/ml
CANREONATE DE POTASSIUM 1 mg/ml
FER SULFATE 5 mg/ml
IBUPROFENE 20 mg/ml
PROPANOLOL 0,5 mg/ml
RANITIDINE 15 mg/ml
SALBUTAMOL 0,4 mg/ml
VITAMINE B ₆ 1 mg/ml

SOLUTIONS

CAPTOPRIL 1 mg/ml
FUROSEMIDE 1 mg/ml

GOUTTES

NIFEDIPINE 1 mg/gtt
RANITIDINE 4 mg/gtt
SALBUTAMOL 0,2 mg/gtt
VITAMINE B6 0,5 mg/gtt

SUSPENSIONS

VITAMINE B COMPLEX 5,8 mg/ml
MAGNESIUM ET ALUMINIUM HYDROXYDE 200 mg/ml

PROPANOLOL CHLORHYDRATE SIROP 0,5 mg/ml

Formulation pour 100 ml:

Propranolol chlorhydrate	0,05 g
Carboxyméthylcellulose sodique	1,00 g
Sodium citrate	0,21 g
Acide citrique monohydraté	0,28 g
Eau dépurée	72,28 g
Nipagine sodique	0,07 g
Saccharose sirop	32,23 g

Caractéristiques chimiques-physiques:

Poudre cristalline blanche ou blanchâtre, il est inodore et avec un goût amer.
Soluble dans l'eau (1:20) et dans l'alcool (1:20).
p.f. = 163-166 °C.

Propriétés pharmacologiques:

Le propranolol a activité β -bloquant, il est un antagoniste compétitif des deux récepteurs β_1 et β_2 , non cardiosélectif.
Il est utilisé dans l'hypertension.

Posologie pédiatrique:

2,5-5mg correspondant à 5-10 ml.

Préparation:

1. Solubiliser la nipagine sodique dans l'eau dépurée.
2. Ajouter le sodium citrate et l'acide citrique monohydraté dans la solution.
3. Ajouter le propranolol chlorhydrate.
4. Ajouter la carboximéthylcellulose sodique peu à la fois, mélanger très lentement.
5. Ajouter le saccharose sirop.
6. Contrôler le pH. (il ne doit pas être supérieur à 4,5).

Instructions et contre-indication:

Contre-indiqué pour les patients avec des maladies obstructives chroniques des voies aériennes.

Stabilité et conservation de propranolol:

Conserver dans des récipients bien fermés, à l'abri de la lumière et de l'air.

Saint Damien Hospital

STABILITY STUDY OF THE PREPARED LIQUID PHARMACEUTICAL FORMS

Method:

STORAGE CONDITION	T (°C)	RH	PERIOD COVERED BY DATA	ANALYTICAL METHOD
<i>Standard</i>	25±2	60±5%	12 months, analysis at time zero (T0) and every 30 days (from TS-1 to TS-12)	UV-VIS spectrophotometric assay
<i>Refrigerator</i>	5±3	-	12 months, analysis at time zero (T0) and every 30 days (from TR-1 to TR-12)	
<i>Accelerated</i>	40±2	60±5%	3 months, analysis at time zero (T0) and every 30 days (from TA-1 through TA-3)
