Description

Date	214/3 BCE Period: 3rd century BCE --> second half --> after 229 BCE, liberation from Macedonian control Reasons: epigraphic formulae, cutter's hand
------	---

Text category: decree

Monument description	Monument type: stele Material: white marble ✓ ornamentation ✓ figurative relief Letters Height Mt: 0.006 Same stonecutter as: IG 2[2] 1706, see Tracy 1990 47 Notes:
----------------------	--

The upper part of the fragment preserves three mouldings, surmounted by what it would seem the remain of a pediment, with a figurative relief. Nonetheless, the fragmentary shapes detectable on this surface are very hard to be interpreted; and, moreover, they may also derive from a

later modification of a simple pediment, for purposes of reuse.

Physical features

Measurements: h: 0.191 * w: 0.20 * t: 0.105

State of conservation: Tiny fragment from the upper part of the stele, broken on all sides; the back is preserved. On the top, the fragment preserves part of the original pediment, with mouldings and, perhaps, traces of a figurative relief.

Legibility: Good.

Reuse: (?) - The traces of sculpted figures above the mouldings may also derive from a later architectural reuse of the stele.

Signs of reuse: (Non clearly detectable, but see above).

Findspot

Acropolis

✓ uncertain

Date of discovery: unknown (before the 1870's)

Circumstances: fortuitous discovery

First edition:

Koehler IG 2 399.

Notes:

Koehler: «Excripsi in arce».

Original location

Acropolis

✓ uncertain
