Supplementary data

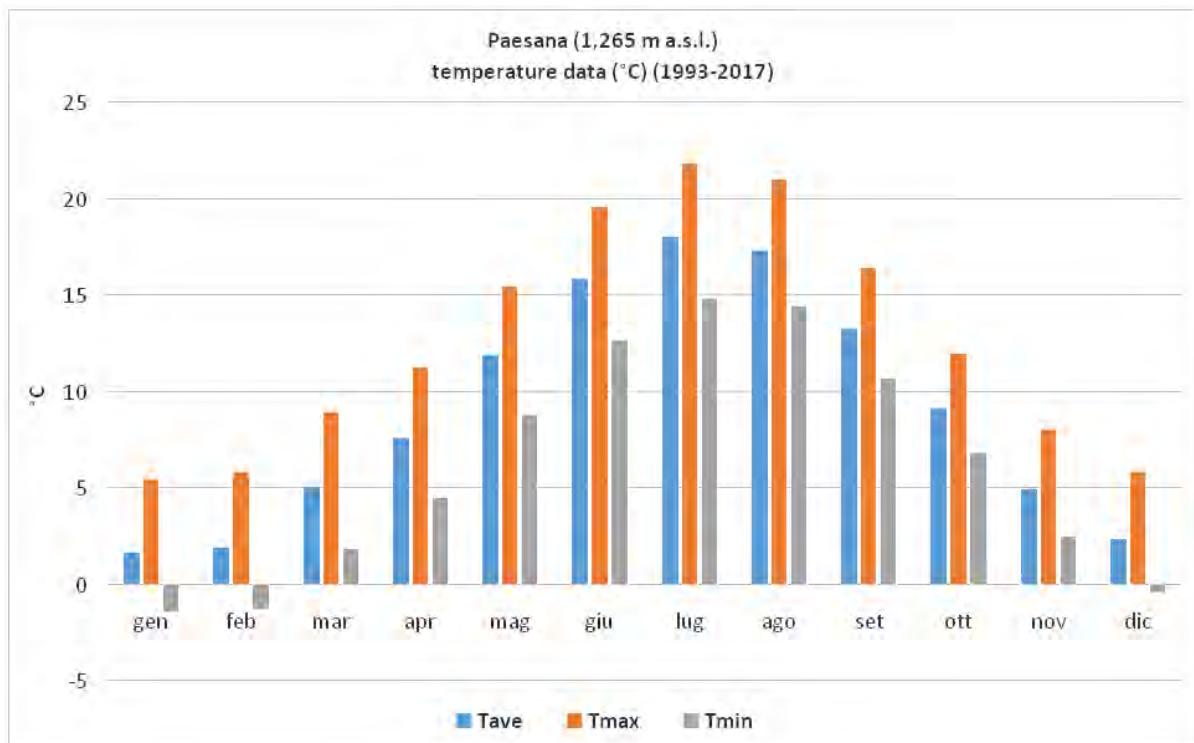

- 1.1.** Area where the annual field trip of the working group for Floristics, Systematics and Evolution of the Italian Botanical Society took place, from 9 to 12 July 2014. For detailed topographic map of each site see Suppl. material 1: 6.
- 1.2.** Monviso and the head of Po Valley.
- 2.1.** Temperature and rainfall data for the weather station of Paesana (1,265 m a.s.l.) in the period 1993-2017.
- 2.2.** Temperature and rainfall data for the weather station of Crissolo (1,342 m a.s.l.) in the period 2012-2017.
- 2.3.** Snowfall data for the weather stations of Paesana (1,265 m a.s.l.) and Pian Giasset (2,150 m a.s.l.) in the period 2002-2017.
- 3.** The 34 participants to the field trip of the working group for Floristics, Systematics and Evolution of the Italian Botanical Society from 9 to 12 July 2014.
- 4.** List of collecting sites, with reference number, date of collection, placename with short description, altitude, main habitats and cartographic coordinates (expressed using UTM projection, ED50 geodetic system, zone 32T). For detailed topographic map of each site see Suppl. material 1: 6.
- 5.** Collection sites displayed on the Geological map of Italy (scale 1:100,000). For detailed code of each site see Suppl. material 1: 4.
- 6.** Topographic maps (scale 1:20,000) with collecting sites. For detailed code of each site see Suppl. material 1: 4.
- 7.1** Public *herbaria* and private collections in which the *exsiccata* collected are kept. Acronyms of public collections refer to Thiers (2017).
- 7.2** Number of *exsiccata* kept in the different collections.
- 8.** Number of *exsiccata* collected for each site. For detailed topographic map of each site see Suppl. material 1: 6.
- 9.** Floristic list of taxa observed at the head of the Po Valley (Piedmont, province of Cuneo) with reference number of collecting site and *herbaria* collections (in brackets). For detailed code of each site see Suppl. material 1: 4, 7.1.

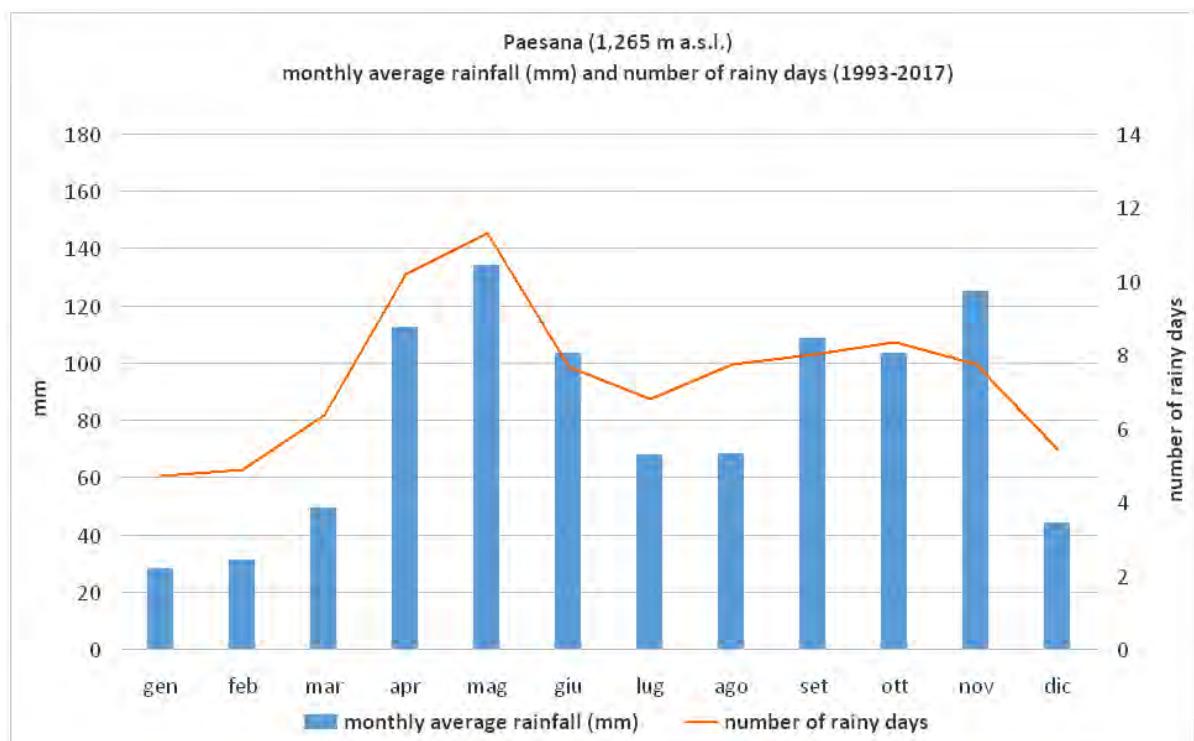

1.1. Area where the annual field trip of the working group for Floristics, Systematics and Evolution of the Italian Botanical Society took place, from 9 to 12 July 2014. Top left: Italy and Piedmont (solid red); Piedmont, Po Valley's municipalities (red edges) and Ostana, Oncino, Crissolo and Paesana municipalities, at the head of Po Valley (light red). For detailed topographic map of each site see Suppl. material 6.

1.2. Monviso and the head of Po Valley (from Serre Superiore, upstream Ostana, July 11, 2014, photo by A. Pistorino).

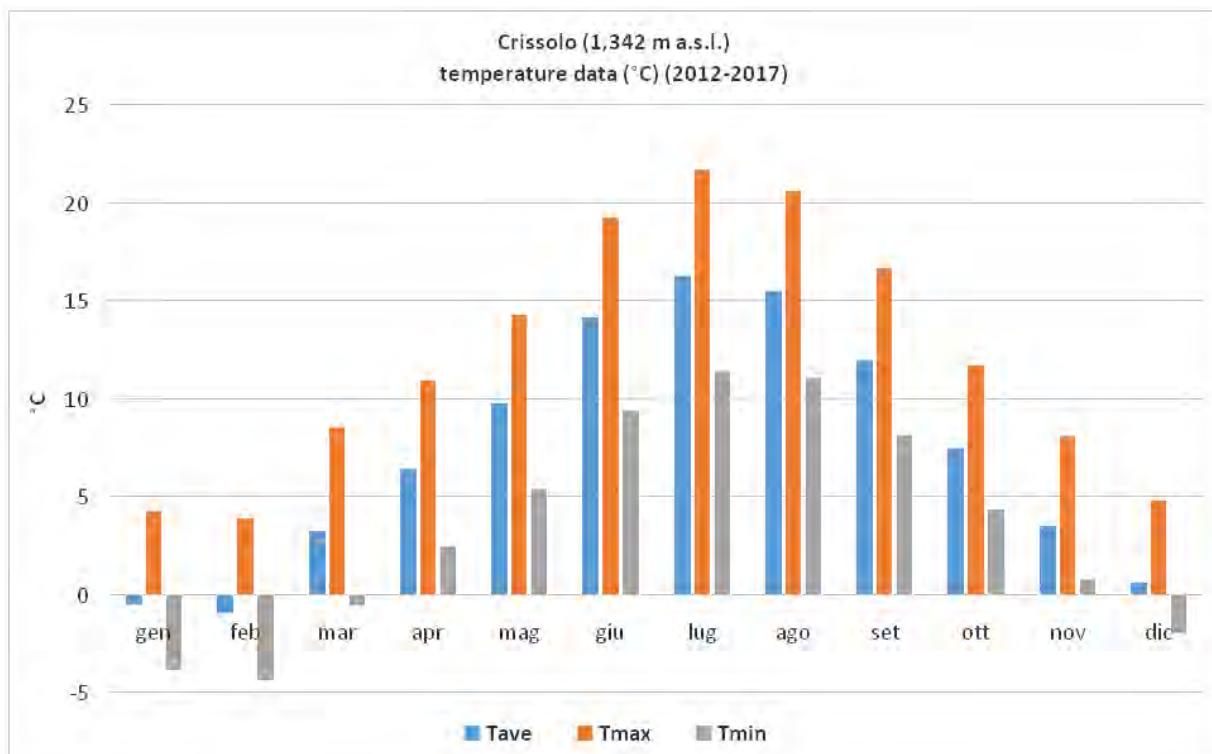

a)

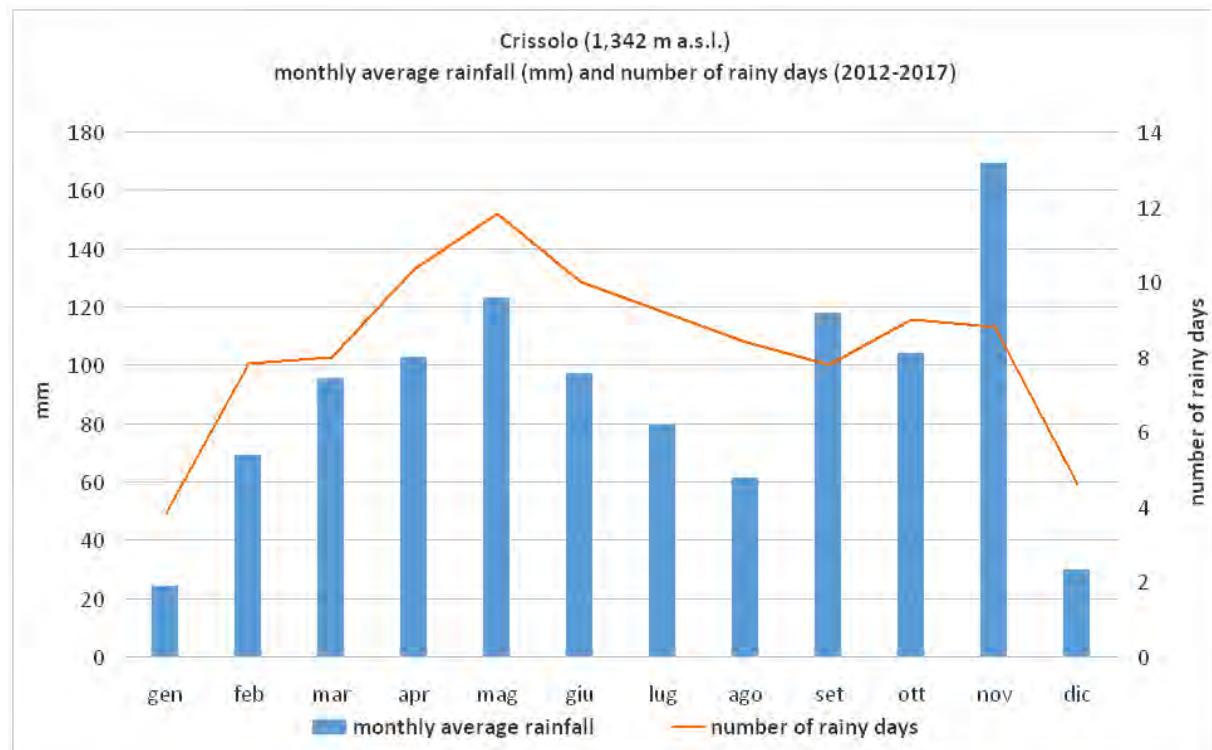

b)

2.1. Temperature and rainfall data for the weather station of Paesana (1,265 m a.s.l.) in the period 1993-2017:

- a) temperature data (average, maximum and minimum expressed in °C)
 - b) rainfall data (monthly average expressed in mm and number of rainy days).
- Data provided by ARPA Piemonte.

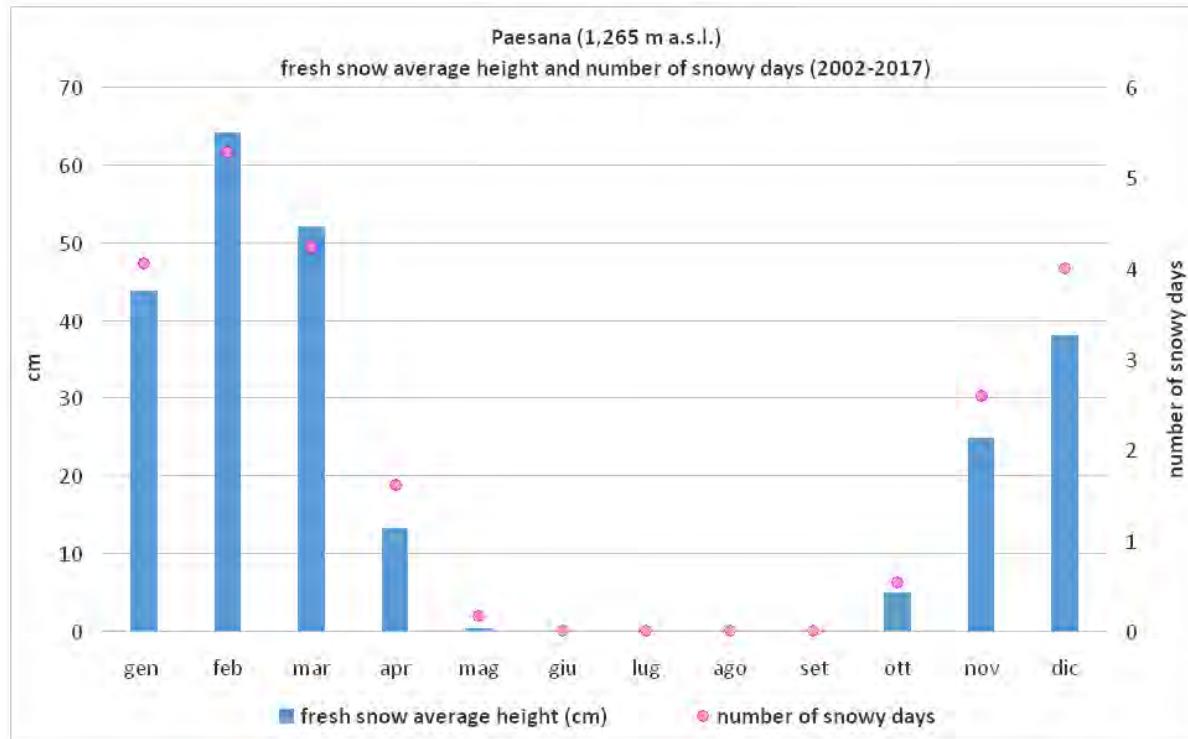

a)

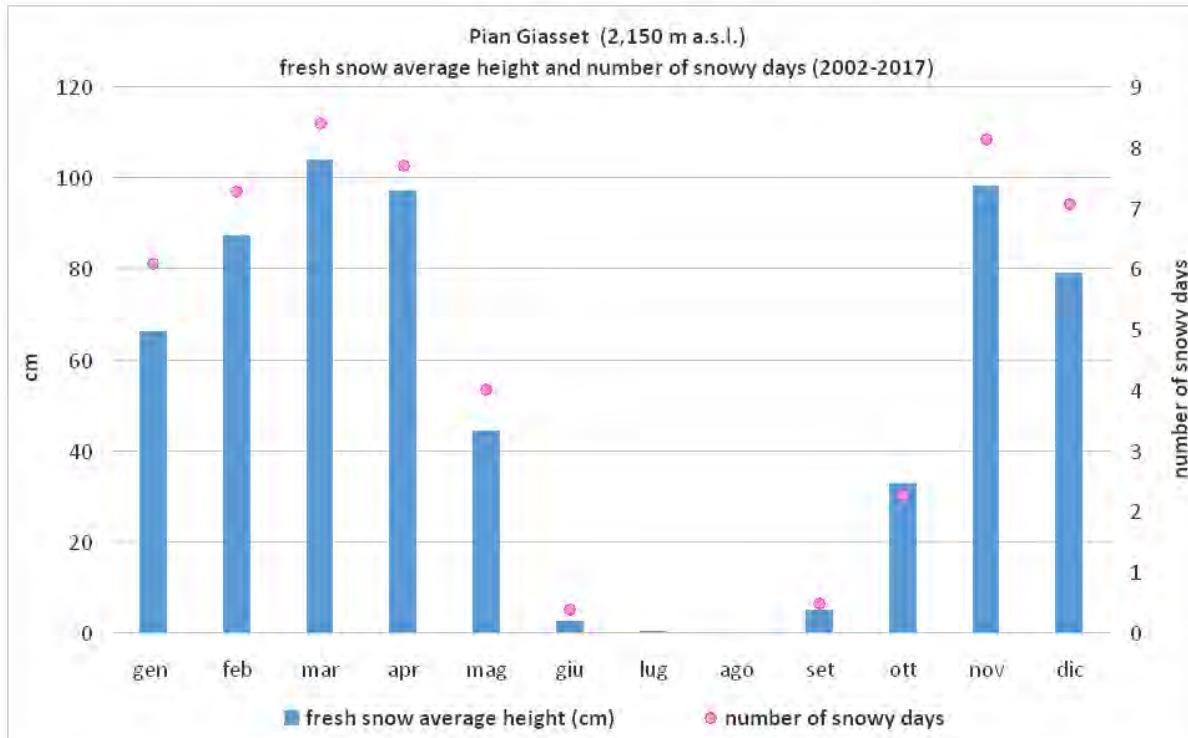

b)

2.2. Temperature and rainfall data for the weather station of Crissolo (1,342 m a.s.l.) in the period 2012-2017:

- a) temperature data (average, maximum and minimum expressed in $^{\circ}\text{C}$)
 - b) rainfall data (monthly average expressed in mm and number of rainy days).
- Data provided by ARPA Piemonte.

a)

b)

2.3. Snowfall data (fresh snow average height expressed in cm and number of snowy days) in the period 2002-2017:

- a) for the weather station of Paesana (1,265 m a.s.l.)
 - b) for the weather station of Pian Giasset (2,150 m a.s.l.), in Crissolo municipality
- Data provided by ARPA Piemonte.

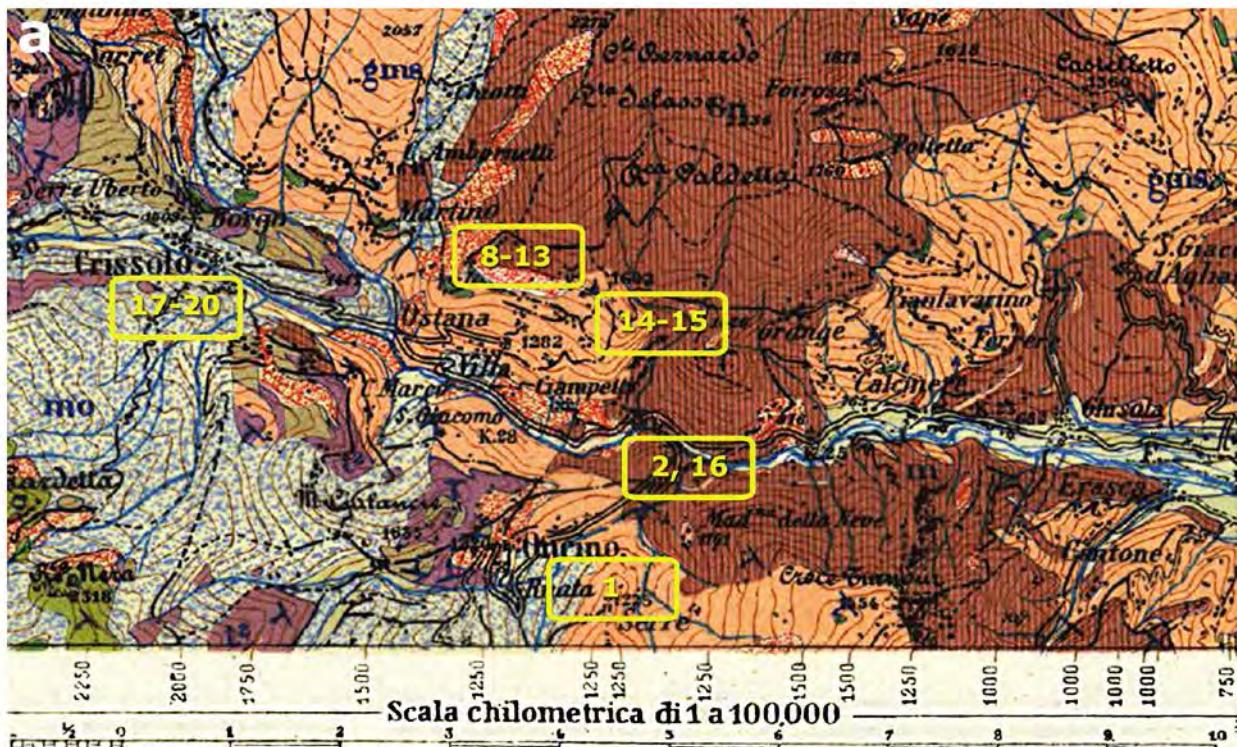

3. The 34 participants to the field trip of the working group for Floristics, Systematics and Evolution of the Italian Botanical Society, together with the staff of the “Parco del Monviso” (Annalisa Rebecchi and Marco Rastelli) (Alpetto Valley, July 10, 2014, photo by L. Rosati).

N.	DAY	LOCALITY	ALTITUDE (m a.s.l.)	HABITAT	UTM X	UTM Y
1	9/7/2014	Oncino, between hamlet of Ruata and hamlet of Serre; Savoia bridge over the Lenta stream	1110	Mixed deciduous forest; wet grassland	356906	4947636
2		Oncino, Rocca Bruenta; first hairpin bend upstream Laita bridge over the Po River	896-910	Siliceous cliff; roadside	358048	4949759
3	10/7/2014	Oncino, Alpetto Valley, Meire (huts) Dacant; path to the Alpetto Lake, right orographic side	1610-1670	Mixed deciduous forest alternating to pasture; shrub; pasture; grassland	354492	4947459
3.1		Oncino, Alpetto Valley; left orographic side, Rocca Bianca face	1850-1870	Calcareous cliff	354192	4947642
4		Oncino, Alpetto Valley; path to the Alpetto Lake, right orographic side, from mixed wood to Alpetto stream crossing	1670-1720	Pasture; stream edges	354196	4947264
4.1		Oncino, Alpetto Valley; left orographic side, the base of the Rocca Bianca face	1680-1800	Debris, scree; pasture on calcareous substrate	353973	4947529
5		Oncino, Alpetto Valley: path to the Alpetto Lake, left orographic side	1850-1900	Pasture on siliceous substrate	353359	4947322
6		Oncino, Alpetto Valley; path to the Alpetto Lake, left orographic side, along the waterfall of the Alpetto stream	1900-2200	Pasture with outcropping rock and cliff	352708	4947406
6.1		Oncino, Alpetto Valley; left orographic side, at the base of the waterfall of the Alpetto stream	1850-1900	Pasture	353316	4947204
7	11/7/2014	Oncino, Alpetto Valley; path to the Alpetto Lake, glacial plateau upstream "Gruppo di Alpetto"	2200-2260	Wet grassland and tall herbs	351967	4946943
8		Ostana, Pian dei Ciarm, upstream of the hamlet of Meire Durandini	1630-1680	Pasture on siliceous substrate	357393	4951496
8.1		Ostana, Pian dei Ciarm, upstream of the hamlet of Meire Durandini.	1630	Wet area, spring	357508	4951405
9		Ostana, hamlet of Serre Superiore; captation of the aqueduct	1520-1550	Wet grassland	356447	4951677
10		Ostana, hamlet of Serre Superiore; upstream Bergeria (hut) del Serre and upstream of captation of the aqueduct	1550-1600	Pasture on siliceous substrate	356559	4951611
12		Ostana, hamlet of Serre Superiore	1520-1570	Pingue grassland	356621	4951409

N.	DAY	LOCALITY	ALTITUDE (m a.s.l.)	HABITAT	UTM X	UTM Y
13	12/7/2014	Ostana, hamlet of Serre Superiore	1570-1580	Wet grassland	357040	4951307
13.1		Ostana, hamlet of Serre Superiore	1550-1570	Mixed deciduous forest with prevalence of <i>Laburnum</i> sp.	356804	4951311
14		Ostana, hamlet of Bernardi; San Nicolao Chapel, car parking	1412	Open space with embanked soil	357577	4950437
14.1		Ostana, hamlet of Bernardi; fountain	1415	Wetland area near the fountain	357392	4950548
15		Ostana, hamlet of Bernardi; Sentiero dei Morti (Path of the dead), right orographic side of the Laita stream	1412-1450	Mixed deciduous forest	357819	4950636
16		Paesana, at the border with Ostana, crossroads to Oncino; close to the Laita bridge, left orographic side of the Po River, above the provincial road n. 26	795-800	Chestnut wood	358033	4949896
17		Crissolo, downstream Meire (huts) Giaromba; dirt road between provincial road n. 26 and bridge over the Po River	1535-1545	Pasture; pasture with anthropized areas	352378	4951776
18		Crissolo, track to Pian (plan) Giasset	1536-1850	Larch forest	353087	4951391
19		Crissolo, track to Pian (plan) Giasset, Meire (huts) Balmasse	1650	Pasture	353420	4950929
20		Crissolo, intermediate skilift departure to Pian (plan) Giasset	1845	Pasture	353087	4951391

4. List of collecting sites, with reference number, date of collection, placename with short description, altitude, main habitats and cartographic coordinates (expressed using UTM projection, ED50 geodetic system, zone 32T). For detailed topographic map of each site see Suppl. Material 1:6.

gms
Micascisti e gneiss minuti. Micascisti granatiferi; id. a granato e sismondina; id. con occhi di sismondina con lenti di gneiss occhiolati e di scisti grafitici incluse nel complesso.

Gn
Gneiss ghiandoni occhiolati e porfiroidi essenzialmente biotitici e con struttura spesso micropegmatitica; gneiss granitoidi.

mo
Morene würmiane, postwürmiane e recenti.

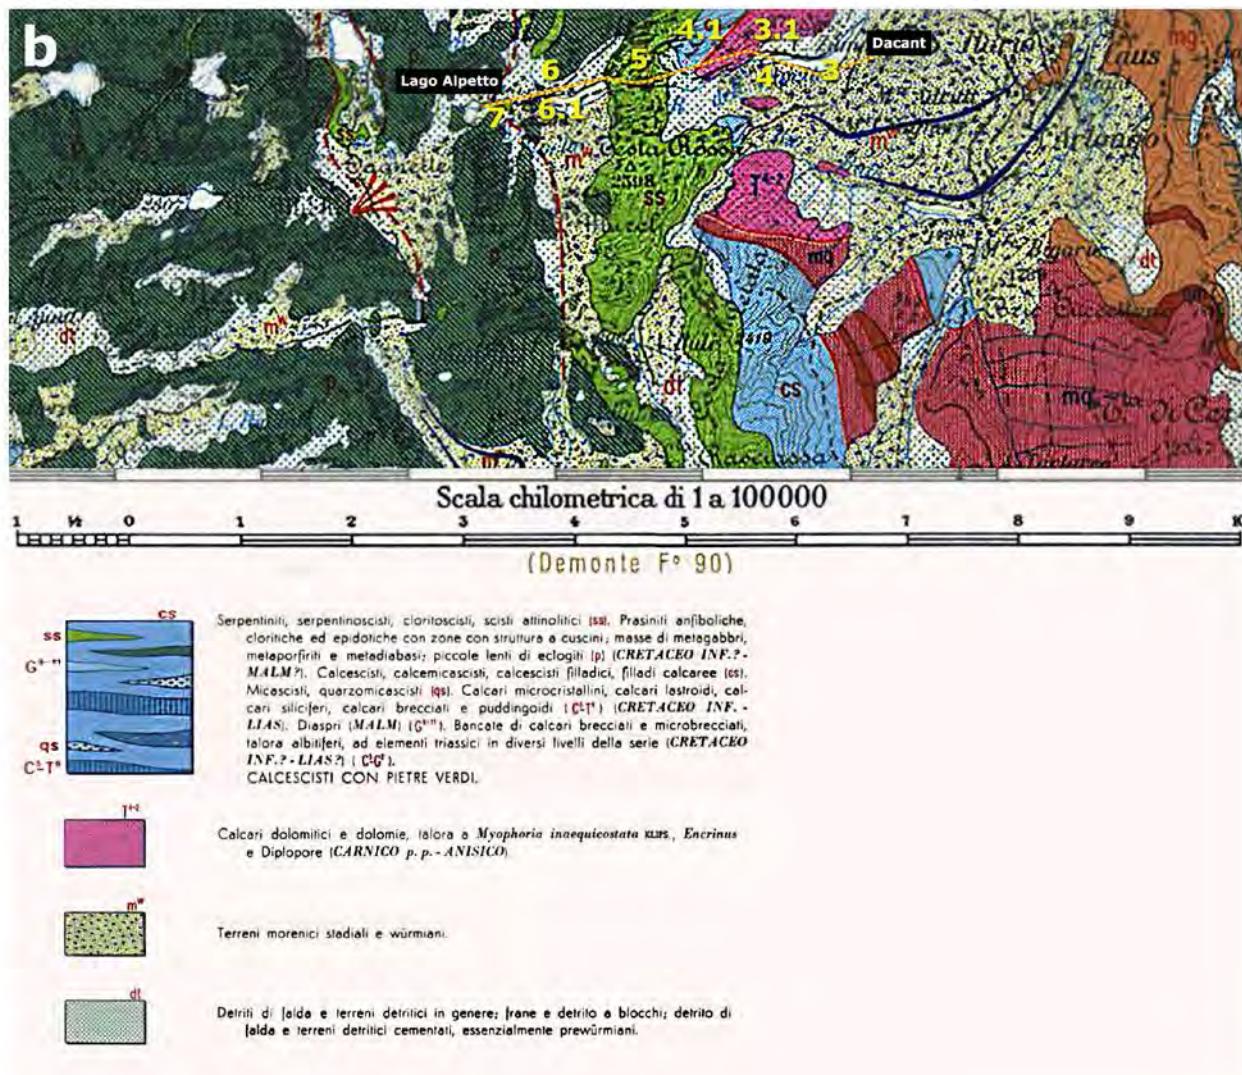

a^c
Coni di dejezione (a^c).
a^d
Detriti di falda (a^d) (macereti, ciapei, clapiers, casse, cassere).

5. Collection sites displayed on the Geological map of Italy (scale 1:100,000). For detailed code of each site see Suppl. material 1: 4.

a. Leaf 67 (Pinerolo); the lithologies of collection sites n. 1, 2, 8 to 13, 14 to 16 are related to Dora-Maira Massif:

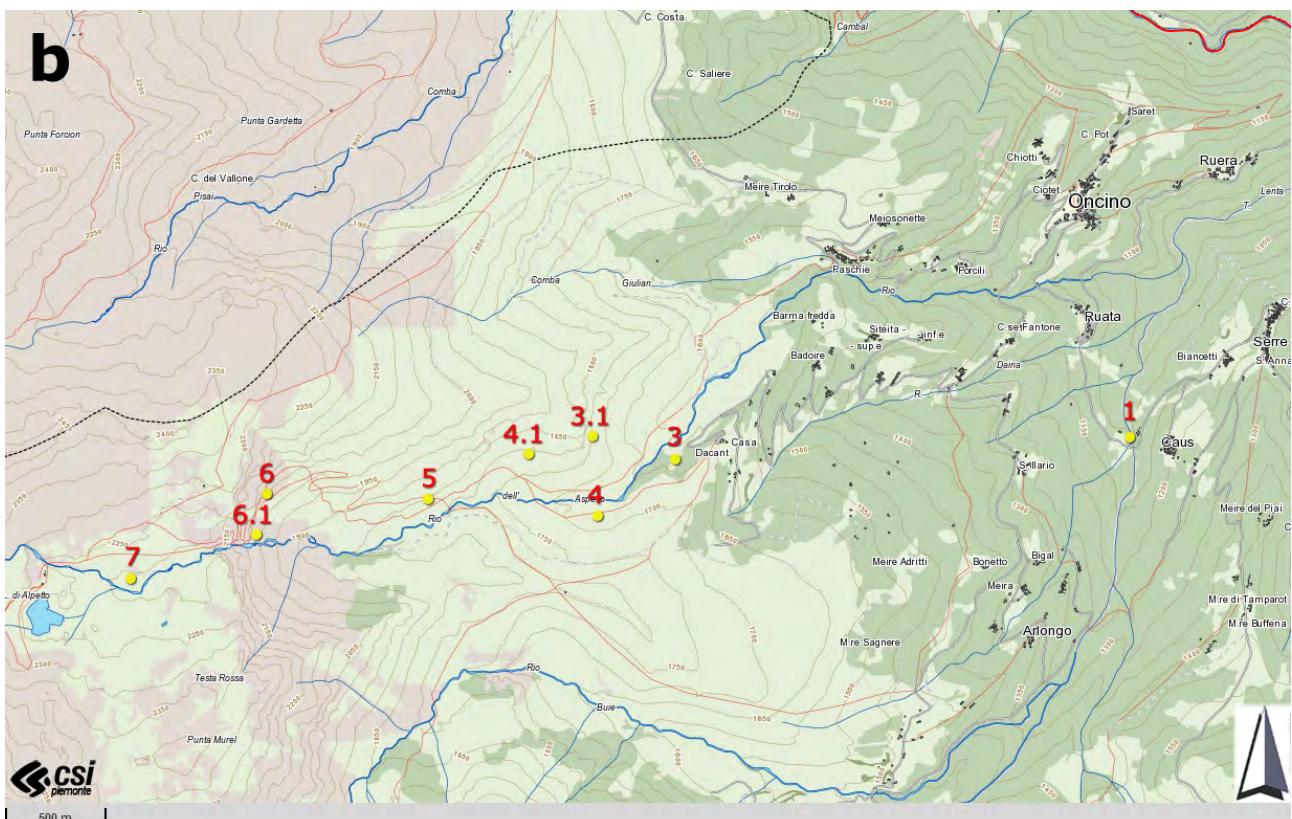

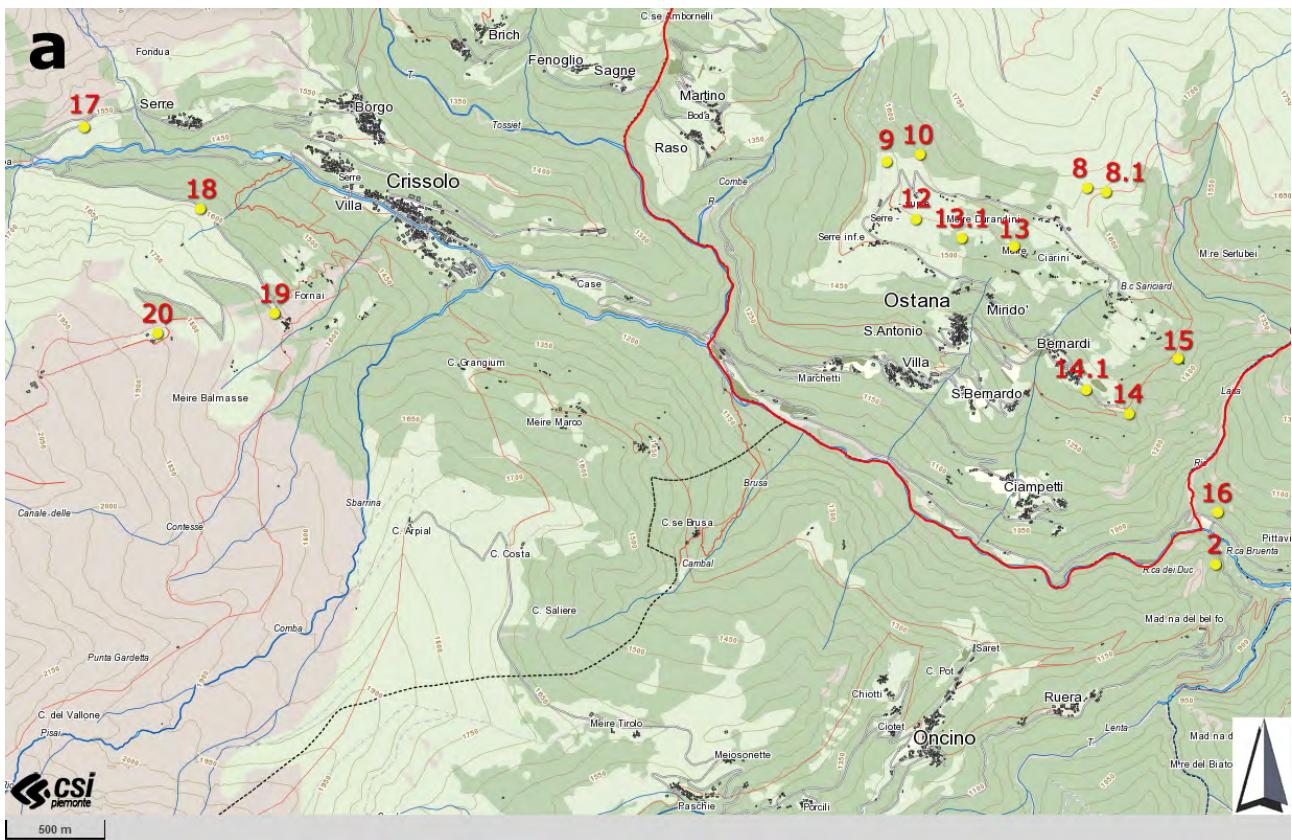

- n. 1: Oncino, between the hamlets of Ruata and Serre: micaschists and minute gneisses (gms), wormian, postwormian and recent morainic deposits (mo)
- n. 2, n. 16: Oncino-Paesana, the Laita bridge over the Po River: occhiadine gneisses (Gn)
- n. 8 to n. 13: Ostana, hamlet of Serre and Meire (huts) Durandini: debris and debris cones (a^c, a^d), micaschists and minute gneisses (gms), occhiadine gneisses (Gn)
- n. 14, n. 15: Ostana, hamlet of Bernardi: micaschists and minute gneisses (gms), occhiadine gneisses (Gn)
- n. 17 to n. 20: Crissolo, track to Pian Giasset: wormian, postwormian and recent morainic deposits (mo).

b. Leaf 78-79 (Argentera-Dronero): the lithologies of sites n. 3 to n.7 in Alpetto Valley are related to "Complex of calcschists with ophiolites":

- n. 3 to n. 7: Oncino, Alpetto valley, from Meire (huts) Dacant (1,610 m a.s.l.) to the Alpetto Lake (2,260 m a.s.l.): morainic stadial and wurmian terrain (m^w), limestone-dolomitic rocks and dolomias (T⁴⁻²), calcschists (cs), serpentinites, serpentinoschists ecc. (ss), amphibolic prasinites ecc. (p), debris (dt).

From: Geological map of Italy (scale 1:100,000): Leaf 67 Pinerolo (reprint Morganti 1951), Leaf 78-79 Argentera-Dronero (coord. Malaroda 1971), Italian Geological Service, Rome.

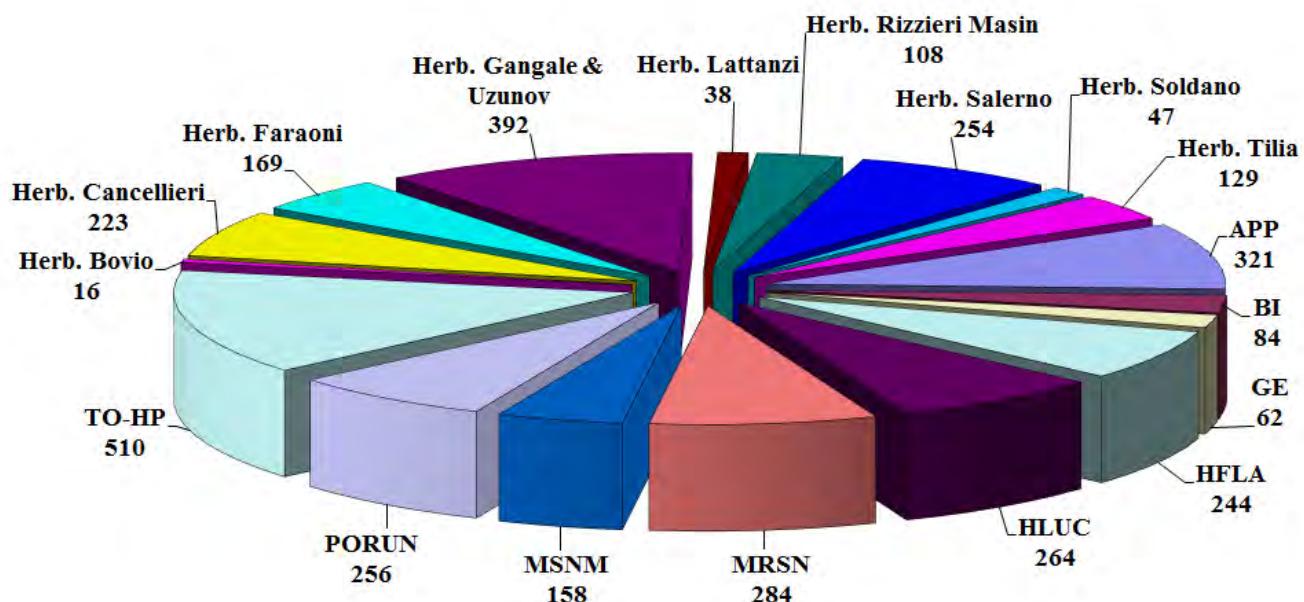

6. Topographic map (scale 1:20,000) with collecting sites (number and yellow dots). For detailed code of each site see Suppl. material 1: 4. From: GeoPortale Piemonte (Regione Piemonte - <http://www.geoportale.piemonte.it/>).

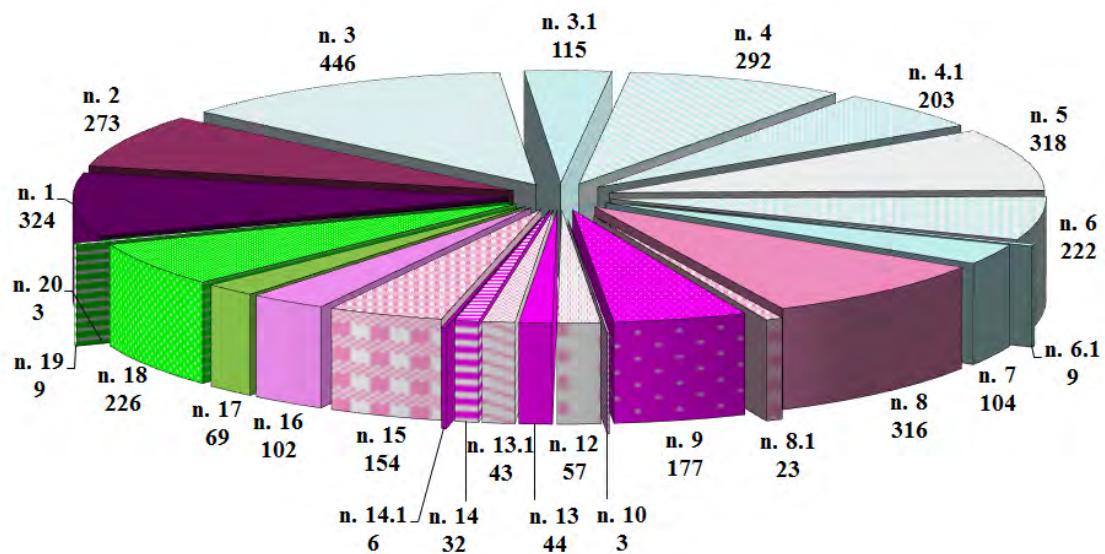

- a) July, 9 (site n. 2), July, 11 (from site n. 8 to n. 16), July, 12 (from site n. 17 to n. 20)
- b) July, 9 (site n. 1) and July, 10 (from site n. 3 to n. 7).

Herbarium code	Institution, place
APP	Apennines Floristic Research Center, Barisciano (L'Aquila)
BI	Herbarium Horti Botanici Barensis, Museum Botanical Garden, University of Bari
GE	Botanical Institute Hanbury and Botanical Garden, University of Genova
HFLA	Herbarium Flaminio, Sapienza University of Rome
HLUC	Herbarium Lucanum, Basilicata University, Potenza
MRSN	Regional Museum of Natural Sciences, Turin, Italy
MSNM	Museum of Natural History, Milan
PORUN	Herbarium Porticense, University of Naples Federico II, Portici (Napoli)
TO-HP	Herbarium Pedemontanum, University of Turin
Private collection code	Botanist, place
Herb. Bovio	Maurizio Bovio, Aosta
Herb. Cancellieri	Laura Cancellieri, at URT, Roma Tre University
Herb. Faraoni	Francesco Faraoni, at URT, Roma Tre University
Herb. Gangale & Uzunov	Carmen Gangale & Dimitar Uzunov, San Fili (CS)
Herb. Lattanzi	Edda Lattanzi, Roma
Herb. Rizzieri Masin	Roberto Rizzieri Masin, Padova
Herb. Salerno	Giovanni Salerno, Roma
Herb. Soldano	Adriano Soldano, Vercelli
Herb. Tilia	Agnese Tilia, Roma

7.1 Public *herbaria* and private collections in which the *exsiccata* collected are kept. Acronyms of public collections refer to Thiers (2017).

7.2 Number of *exsiccata* kept in the different collections.

8. Number of *exsiccata* collected for each site (July, 9 in shades of purple colour; July, 10 in shades of light blue; July, 11 in shades of pink; July, 12 in shades of light green). For detailed topographic map of each site see Suppl. material 1: 6.

9. Floristic list of taxa observed at the head of the Po Valley (Piedmont, province of Cuneo) with reference number of collecting site and *herbaria* collections (in brackets; code in Suppl. material 1: 7.1.). Synonyms are reported in square brackets only in the case of changes occurred since Conti et al. (2005, 2007). Letter “E” indicates endemic taxon for Italy; letter “e” refers to exclusive taxon; letter “A” indicates alien taxon, followed by “NAT” if naturalized taxon and INV if invasive taxon at a regional level. Symbol “***” indicates taxon new for the regional flora and “*” indicates confirmed taxon.

Lycopodiopsida
Lycopodiaceae

Huperzia selago* (L.) Bernh. ex Schrank & Mart. subsp. *selago
3 (Herb. Gangale & Uzunov), 5 (GE, Herb. Salerno), 8 (Herb. Rizzieri Masin)

***Lycopodium clavatum* L.**
4 (TO-HP), 5 (APP)

Selaginellaceae

***Selaginella helvetica* (L.) Spring**
2 (APP, TO-HP, Herb. Rizzieri Masin), 3 (TO-HP, Herb. Cancellieri, Herb. Gangale & Uzunov, Herb. Salerno, Herb. Tilia), 4 (MSNM, PORUN, Herb. Cancellieri), 4.1 (Herb. Salerno), 5 (APP), 8 (Herb. Rizzieri Masin), 18 (Herb. Cancellieri 2 exs.)

***Selaginella selaginoides* (L.) P.Beauv. ex Schrank & Mart.**
3 (Herb. Tilia), 4 (PORUN, Herb. Cancellieri), 4.1 (Herb. Salerno), 5 (APP), 6 (TO-HP), 18 (PORUN, Herb. Cancellieri)

Polypodiopsida
Equisetidae
Equisetaceae

***Equisetum arvense* L.**
5 (PORUN), 17 (TO-HP)

Ophioglossidae
Ophioglossaceae

***Botrychium lunaria* (L.) Sw.**
4 (PORUN), 5 (Herb. Salerno), 6 (MSNM, TO-HP, Herb. Faraoni, Herb. Gangale & Uzunov)

Polypodiidae
Pteridaceae

***Cryptogramma crispa* (L.) R.Br. ex Hook.**
3 (TO-HP Herb. Gangale & Uzunov, Herb. Salerno, Herb. Tilia), 4 (BI, HLUC, MRSN, PORUN), 5 (APP, TO-HP), 6 (Herb. Cancellieri), 7 (TO-HP), 8 (Herb. Cancellieri, Herb. Faraoni, Herb. Rizzieri Masin)

Dennstaedtiaceae

Pteridium aquilinum (L.) Kuhn subsp. *aquilinum*
16 (TO-HP)

Cystopteridaceae

Cystopteris dickieana R.Sim
6 (GE)

Cystopteris fragilis (L.) Bernh.
2 (HLUC), 3 (TO-HP), 14.1 (HLUC), 18 (PORUN, Herb. Gangale & Uzunov)

Gymnocarpium dryopteris (L.) Newman
3 (HFLA, TO-HP, Herb. Gangale & Uzunov), 4 (PORUN), 5 (MRSN), 7 (TO-HP)

Gymnocarpium robertianum (Hoffm.) Newman
18 (PORUN, Herb. Gangale & Uzunov 2 exs.)

Aspleniaceae

Asplenium adiantum-nigrum L. subsp. *adiantum-nigrum*
2 (HFLA, Herb. Rizzieri Masin)

Asplenium cuneifolium Viv. subsp. *cuneifolium*
4 (PORUN, Herb. Rizzieri Masin), 6 (GE, TO-HP)

Asplenium ruta-muraria L. subsp. *ruta-muraria*
4.1 (Herb. Gangale & Uzunov, Herb. Soldano)

Asplenium septentrionale (L.) Hoffm. subsp. *septentrionale*
2 (APP, MRSN, PORUN, TO-HP, Herb. Cancellieri), 3 (HLUC, Herb. Salerno), 4 (PORUN), 4.1 (Herb. Salerno), 5 (MRSN), 6 (GE), 8 (PORUN)

Asplenium trichomanes L. subsp. *trichomanes*
1 (MRSN, Herb. Tilia), 2 (HLUC, Herb. Gangale & Uzunov), 6 (GE)

Asplenium viride Huds.
4 (MSNM, PORUN, Herb. Lattanzi), 5 (MRSN, Herb. Cancellieri), 6 (HLUC)

Athyriaceae

Athyrium distentifolium Tausch ex Opiz
1 (HFLA, TO-HP), 3 (Herb. Rizzieri Masin), 4 (Herb. Rizzieri Masin), 8 (TO-HP), 14 (TO-HP)

Athyrium filix-femina (L.) Roth
1 (APP 2 exs., HLUC), 3 (TO-HP), 4 (PORUN), 17 (TO-HP)

Thelypteridaceae

Oreopteris limbosperma (All.) Holub
2 (TO-HP)

Phegopteris connectilis (Michx.) Watt
3 (GE, MRSN, Herb. Salerno), 7 (Herb. Salerno), 18 (TO-HP)

Dryopteridaceae

Dryopteris cambreensis (Fraser-Jenk.) J.Beitel & W.R.Buck subsp. *insubrica* (Oberh. & Tavel ex Fraser-Jenk.) Fraser-Jenk.

[*Dryopteris affinis* (Lowe) Fraser-Jenk. subsp. *cambreensis* Fraser-Jenk.]
1 (HFLA), 2 (HFLA, TO-HP, Herb. Rizzieri Masin), 3 (MSNM, TO-HP), 4 (HLUC), 5 (Herb. Gangale & Uzunov), 8 (Herb. Cancellieri, Herb. Soldano), 9 (TO-HP, Herb. Rizzieri Masin), 13 (HLUC), 13.1 (TO-HP), 15 (TO-HP, Herb. Gangale & Uzunov)
16 (TO-HP)

The specimens collected in the sites 13 and 15 are doubtfully referable to this taxon.

Dryopteris carthusiana (Vill.) H.P.Fuchs
1 (MSNM), 4 (Herb. Rizzieri Masin)

Dryopteris dilatata (Hoffm.) A.Gray
3 (MRSN, MSNM), 8 (Herb. Rizzieri Masin), 9 (APP)

Dryopteris filix-mas (L.) Schott
1 (HFLA)

Polystichum lonchitis (L.) Roth
3 (PORUN, TO-HP), 4 (HLUC, MRSN, PORUN, Herb. Rizzieri Masin)

Polypodiaceae

Polypodium vulgare L.
1 (HLUC, MSNM, PORUN, TO-HP, Herb. Gangale & Uzunov, Herb. Rizzieri Masin, Herb. Salerno), 2 (HFLA, HLUC, TO-HP), 3 (BI, MRSN), 14 (Herb. Rizzieri Masin)

Pinidae
Pinaceae

Abies alba Mill.
18 (PORUN)

Larix decidua Mill.
8 (BI, MRSN, PORUN, TO-HP)

Cupressaceae

Juniperus communis L.
5 (Herb. Salerno), 8 (HLUC, MRSN, TO-HP), 18 (TO-HP)

Monocots
Tofieldiaceae

Tofieldia calyculata (L.) Wahlenb.

3 (TO-HP), 3.1 (HFLA), 4 (PORUN), 4.1 (Herb. Salerno), 6 (APP), 17 (HLUC), 18 (PORUN, Herb. Cancellieri, Herb. Gangale & Uzunov, Herb. Faraoni, Herb. Salerno)

Melanthiaceae

Paris quadrifolia L.

1 (Herb. Gangale & Uzunov, Herb. Rizzieri Masin), 18 (Herb. Salerno)

Veratrum album L.

[incl. *V. lobelianum* Bernh.]

1 (APP, HFLA, Herb. Faraoni), 6.1 (Herb. Gangale & Uzunov), 9 (HLUC), 12 (PORUN, Herb. Cancellieri), 13.1 (MSNM, Herb. Tilia)

The specimens are identified both as *V. album* and *V. lobelianum* Bernh. In Bartolucci et al. (2018) *V. lobelianum* is included in *V. album*.

Colchicaceae

Colchicum autumnale L.

3 (TO-HP), 4.1 (TO-HP)

Liliaceae

Lilium bulbiferum L. subsp. ***croceum*** (Chaix) Jan

3.1 (HFLA), 15 (TO-HP)

Orchidaceae

Anacamptis pyramidalis (L.) Rich.

3.1 (APP)

Coeloglossum viride (L.) Hartm.

1 (Herb. Rizzieri Masin), 4 (no *exsiccatum* photo by Stinca), 4.1 (Herb. Soldano), 5 (no *exsiccatum* photo by Romano)

Dactylorhiza maculata (L.) Soó subsp. ***fuchsii*** (Druce) Hyl.

1 (APP, HLUC, HFLA), 4 (HLUC, PORUN), 9 (APP, HLUC, PORUN), 13 (HLUC, Herb. Gangale & Uzunov), 17 (HLUC)

Epipactis atrorubens (Hoffm.) Besser

3.1 (APP)

Gymnadenia conopsea (L.) R.Br.

4 (HLUC, PORUN), 5 (HLUC)

Gymnadenia odoratissima (L.) Rich.

18 (PORUN)

Herminium monorchis (L.) R.Br.

3 (PORUN, TO-HP, Herb. Cancellieri), 4.1 (Herb. Soldano), 5 (APP)

Neotinea ustulata (L.) R.M.Bateman, Pridgeon & M.W.Chase

[*Orchis ustulata* L.]

3.1 (APP), 4 (Herb. Rizzieri Masin), 5 (HLUC)

Neottia ovata (L.) Bluff & Fingerh.

[*Listera ovata* (L.) R.Br.]

17 (HLUC)

Nigritella corneliana (Beauverd) Gölz & H.R.Reinhard

5 (HLUC), 6 (APP)

Nigritella rhellcani Teppner & E.Klein

3 (HFLA, PORUN), 5 (APP, HLUC)

Platanthera bifolia (L.) Rich.

4 (no *exsiccatum* photo by Romano)

Platanthera chlorantha (Custer) Rchb.

3 (PORUN)

Asphodelaceae

Asphodelus macrocarpus Parl. subsp. ***macrocarpus***

13.1 (APP, MSNM)

The two specimens are not ripe enough to clearly show the capsule characters considered in Díaz Lifante and Valdés (1996) distinctive between *A. macrocarpus* and *A. albus* Mill. subsp. *delphinensis* (Gren. & godr.) Z. Díaz & Valdés; moreover, these characters seem to be not significant or overlapping in north-west Italian populations. Currently only the presence of *A. macrocarpus* Parl. subsp. *macrocarpus* is assessed; the presence of *A. albus* subsp. *delphinensis*, in Díaz Lifante and Valdés (1996), is given generically in the Western Alps and is to be further investigated.

Asparagaceae

Maianthemum bifolium (L.) F.W. Schmidt

1 (Herb. Salerno), 3 (HLUC, MRSN, PORUN, TO-HP, Herb. Salerno), 4 (Herb. Lattanzi), 18 (Herb. Faraoni, Herb. Gangale & Uzunov)

Ornithogalum kochii Parl. subsp. ***monticola*** (Jord. & Fourr.) Peruzzi

[*Ornithogalum monticolum* Jord. & Fourr.]

6 (APP, MSNM), 9 (HLUC), 17 (BI), 18 (APP, HFLA, PORUN, Herb. Lattanzi)

Paradisea liliastrum (L.) Bertol.

3.1 (HFLA), 4 (BI, PORUN), 6 (APP, MRSN, Herb. Faraoni, Herb. Gangale & Uzunov)

Polygonatum multiflorum (L.) All.

16 (Herb. Salerno)

Polygonatum odoratum (Mill.) Druce

4.1 (Herb. Soldano)

Polygonatum verticillatum (L.) All.

3.1 (HFLA), 4 (PORUN), 4.1 (Herb. Salerno, Herb. Soldano), 5 (no *exsiccatum* photo by Rosati), 6 (Herb. Cancellieri)

Juncaceae

Juncus alpinoarticulatus Chaix subsp. *alpinoarticulatus*

3.1 (MSNM), 4 (PORUN)

Juncus articulatus L. subsp. *articulatus*

5 (Herb. Cancellieri), 8 (MRSN), 9 (Herb. Cancellieri, Herb. Gangale & Uzunov Herb. Salerno)

Juncus bufonius L.

9 (MRSN, MSNM, Herb. Gangale & Uzunov, Herb. Salerno, Herb. Tilia)

Juncus conglomeratus L.

8 (Herb. Salerno), 9 (PORUN)

Juncus effusus L. subsp. *effusus*

8 (MRSN), 9 (HLUC, MRSN), 13 (HFLA)

Juncus filiformis L.

4 (TO-HP)

Juncus jacquinii L.

7 (MRSN, TO-HP)

A INV *Juncus tenuis* Willd.

9 (APP, HFLA, HLUC, MRSN, MSNM, Herb. Gangale & Uzunov, Herb. Salerno, Herb. Tilia)

Juncus triglumis L. subsp. *triglumis*

4 (TO-HP), 7 (Herb. Cancellieri)

Luzula alpinopilosa (Chaix) Breistr. subsp. *alpinopilosa*

4.1 (TO-HP), 5 (MRSN), 6.1 (Herb. Gangale & Uzunov)

Luzula lutea (All.) DC. subsp. *lutea*

6 (Herb. Cancellieri)

Luzula luzulina (Vill.) Racib.

18 (Herb. Gangale & Uzunov)

Luzula luzuloides (Lam.) Dandy & Wilmott subsp. *luzuloides*

1 (Herb. Gangale & Uzunov), 9 (Herb. Rizzieri Masin)

Luzula multiflora (Ehrh.) Lej. subsp. *multiflora*

3 (HFLA), 3.1 (HFLA), 5 (TO-HP), 5 (Herb. Gangale & Uzunov 2 exs.), 8 (MRSN, TO-HP), 8.1 (Herb. Gangale & Uzunov), 9 (HLUC), 15 (HFLA, Herb. Gangale & Uzunov), 18 (Herb. Cancellieri)

After the revision of these *Luzula* specimens, in 2017 the revision of a specimen collected in the Po Valley (Crissolo municipality) made by the specialist of the genus *Luzula* Bačić led to assess for the

first time the presence of *L. expectata* Bačić & Jogan in Piedmont (Pascale et al. 2017). Given its close morphological similarity with *L. multiflora*, *L. sudetica* (Willd.) Schult. and *L. alpina* Hoppe (Bačić et al. 2007, Pignatti 2017), an in-depth or a specialist revision of the specimens collected is recommended (A. Selvaggi, pers. comm.).

Bromopsis erecta (Huds.) Fourr. subsp. ***erecta***
[*Bromus erectus* Huds. subsp. *erectus*]
6 (HLUC), 17 (Herb. Gangale & Uzunov, Herb. Salerno)

The specimen collected in the site 17 is identified as *Bromus erectus* Huds. subsp. *longiflorus* (Willd. ex Spreng.) Arcang. This taxon is separated by Conti et al. (2005) from the subsp. *erectus*, morphologically distinguishable, reported for central Italy; Tison and De Foucault (2014) consider it a morphological outcome of richness of nitrogen in the soil (E. Banfi, pers. comm.); Bartolucci et al. (2018) don't consider this taxa and synonymize it with *Bromopsis erecta* (Huds.) Fourr. subsp. *erecta*.

Alchemilla tenerrima S.E.Fröhner
18 (HFLA)

** *Alchemilla transiens* (Buser) Buser
3 (BI)

This specimen has been identified as *A. subtruncata* Buser by the genus specialist S.E. Fröhner having characteristically large and obovate leaves. Fröhner (2002) considers this taxon falling within the variability of *A. transiens* and Buser named it *A. transiens* f. *latifolia*. The issue of taxonomic acknowledgment of these entities and of the existence of local endemics taxa of the genus *Alchemilla* has not yet been solved, but if *A. subtruncata* had its own systematic autonomy, it would probably be a narrow endemism of the Western Alps (F. Festi, pers. comm.).

Draba dubia* Suter subsp. *dubia

3 (TO-HP), 4.1 (Herb. Salerno, Herb. Soldano), 5 (GE, MRSN), 6 (APP 2 exs.)

***Erysimum* cfr. *jugicola* Jord.**

3 (TO-HP), 3.1 (HFLA), 4 (PORUN, Herb. Rizzieri Masin), 4.1 (Herb. Gangale & Uzunov, Herb. Salerno), 5 (APP 2 exs., GE), 6 (MRSN 2 exs., HLUC, MSNM)

The specimens collected are devoid of ripe siliques and seeds that would allow certain specific attribution (S. Peccenini, pers. comm.). *E. jugicola* is morphologically very similar to *E. burnati* G. Vidal, but they differ for chromosomal numbers (respectively 2n=18 and 2n=14). *E. burnati* is not recognized in up-to-date French floras, while it is recognized in the new Flora d'Italia (Pignatti 2017).

4.1 (Herb. Gangale & Uzunov), 8 (TO-HP), 9 (HLUC), 13.1 (TO-HP)

Verbascum thapsus L. subsp. *montanum* (Schrad.) Bonnier & Layens

4.1 (Herb. Gangale & Uzunov)

Lentibulariaceae

Pinguicula leptoceras Rchb.

[incl. *Pinguicula arvetii* Genty]

3 (✓PORUN), 3.1 (✓APP), 6 (✓APP), 7 (MRSN, ✓GE)

The specialist of the genus *Pinguicula* P. Zaccara considers *P. leptoceras* and *P. arvetii* Genty distinct taxa. The specimens indicated with “✓” are identified as *Pinguicula arvetii*. Yet, the nomenclature and taxonomy of the name *P. arvetii* Genty require further studies (De Castro et al. 2016, Bartolucci et al. 2018). The specimen collected in the site 7 (GE) is doubtfully referable to this taxon.

Pinguicula cfr. *reichenbachiana* Schindl.

17 (BI)

Pinguicula vulgaris L. subsp. *vulgaris*

3.1 (HFLA), 6 (APP 2 exs., MSNM), 8 (APP), 17 (HLUC), 18 (HFLA)

The specimen collected in the site 3.1 is doubtfully referable to this taxon.

Lamiaceae

Ajuga genevensis L.

3 (PORUN)

Phyteuma hemisphaericum L.

4 (MRSN, Herb. Faraoni, Herb. Rizzieri Masin), 5 (no *exsiccatum* photo by Rosati), 6 (GE)

Phyteuma michelii All.

[incl. *Phyteuma scorzoniferifolium* Vill.]

4 (HLUC), 15 (Herb. Gangale & Uzunov), 16 (APP, HFLA, HLUC, MRSN, MSNM, PORUN, Herb. Gangale & Uzunov)

Phyteuma ovatum Honck. subsp. ***ovatum***

1 (APP, HFLA), 17 (BI, HLUC), 18 (APP, HFLA, PORUN, TO-HP, Herb. Cancellieri, Herb. Faraoni, Herb. Gangale & Uzunov)

Phyteuma spicatum L. subsp. ***spicatum***

2 (HFLA), 8 (Herb. Salerno)

Asteraceae

Achillea collina (Becker ex Wirtg.) Heimerl

1 (MRSN), 8 (APP), 9 (HLUC)

Achillea collina (Becker ex Wirtg.) Heimerl morphotype

1 (TO-HP), 2 (APP, BI 2 exs., MSNM, Herb. Gangale & Uzunov), 8 (HLUC, TO-HP), 9 (BI, HLUC), 12 (Herb. Gangale & Uzunov), 13.1 (APP), 15 (APP)

These specimens have some morphological characters of *A. collina*, but proazulenes are absent; it's probably a hybrid form with *A. millefolium* L. or with *A. roseoalba* Ehrend. (pink flowers) (M. Buccheri, V. Casolo, F. Martini, pers. comm.).

Achillea millefolium L. subsp. ***millefolium***

1 (APP), 8 (MSNM)

The specimen collected in the site 1 is doubtfully referable to this taxon (indicated as *A. millefolium* L. s.l.).

Adenostyles alliariae (Gouan) A.Kern.
6 (HLUC, MRSN)

Adenostyles alpina (L.) Bluff & Fingerh. subsp. *alpina*
6.1 (Herb. Gangale & Uzunov)

Antennaria carpatica (Wahlenb.) Bluff & Fingerh. subsp. *helvetica* (Chrtek & Pouzar) Chrtek & Pouzar
[incl. *Antennaria carpatica* (Wahlenb.) Bluff & Fingerh. subsp. *amphilanata* Chrtek & Pouzar]
3 (MSNM, Herb. Tilia), 4.1 (Herb. Tilia), 5 (APP), 8 (Herb. Tilia)

Antennaria dioica (L.) Gaertn.
3 (MRSN, PORUN, Herb. Faraoni, Herb. Gangale & Uzunov 2 exs., Herb. Salerno 2 exs., Herb. Tilia), 4 (BI, HLUC, PORUN, Herb. Cancellieri, Herb. Faraoni), 4.1 (Herb. Salerno, Herb. Tilia), 6 (HLUC, Herb. Gangale & Uzunov), 7 (MRSN), 8 (HLUC, TO-HP, Herb. Salerno)

Arnica montana L. subsp. *montana*
3 (HFLA, PORUN, Herb. Faraoni 2 exs.), 4 (MRSN), 6 (HLUC), 8 (Herb. Cancellieri, Herb. Faraoni, Herb. Salerno), 18 (HFLA), 19 (BI)

Artemisia absinthium L.
2 (TO-HP, Herb. Faraoni)

Artemisia vulgaris L.
2 (Herb. Faraoni, TO-HP), 18 (TO-HP)

Aster alpinus L. subsp. *alpinus*
3 (TO-HP), 3.1 (HFLA), 5 (APP, Herb. Gangale & Uzunov, Herb. Salerno), 6 (Herb. Faraoni)

Bellidiastrum michelii Cass.
3 (Herb. Salerno), 3.1 (HFLA), 4.1 (Herb. Salerno), 18 (Herb. Gangale & Uzunov 2 exs.)

Bupthalmum salicifolium L. s.l.
3 (TO-HP), 3.1 (APP), 4.1 (Herb. Gangale & Uzunov), 15 (TO-HP)
The specimens' fruits are not developed enough to permit to distinguish between *B. salicifolium* L. subsp. *flexile* (Bertol.) Garbari and subsp. *salicifolium*, although the separation of these entities seems to be weak. The revision of the specimens kept in TO-HP points out the existence of individuals of the nominal subspecies and of morphotypes with intermediate characters between the two subspecies; thus the presence of the subsp. *flexile* in Piedmont remains uncertain (D. Bouvet and A. Selvaggi, pers. comm.).

Carduus defloratus L. subsp. *defloratus*
3 (HFLA), 4 (BI, TO-HP), 4.1 (Herb. Gangale & Uzunov 2 exs.), 5 (HLUC, Herb. Cancellieri), 20 (MSNM)
The specimen collected in the site 20 is doubtfully referable to this taxon (indicated as *C. defloratus* L. s.l.).

Carduus personata (L.) Jacq. subsp. *personata*
1 (HFLA, Herb. Rizzieri Masin)

Centaurea nervosa Willd. subsp. *nervosa*

[*Centaurea uniflora* Turra subsp. *nervosa* (Willd.) Bonnier & Layens]

2 (HLUC), 5 (Herb. Salerno), 8 (MRSN, TO-HP)

Probably some specimens are hybrids between *C. nervosa* (also considered a subspecies of *C. uniflora*) and *C. uniflora* Turra.

Centaurea nigrescens Willd. subsp. ***transalpina*** (Schleich ex DC.) Nyman

1 (APP 4 exs., MRSN, TO-HP, Herb. Salerno), 8 (HLUC), 16 (APP 2 exs., HLUC)

The specimens' flower heads are not enough developed to permit a certain distinction between the nominal subspecies *C. nigrescens* subsp. *nigrescens* and the subsp. *transalpina*. Usually on the Alps the subsp. *transalpina* replaces the subsp. *nigrescens* at about 800-1000 m a.s.l. These specimens have been collected around this altitude (M. Barbo, pers. comm.).

The specimens collected in the site 1 are doubtfully referable to this taxon.

* ***Centaurea scabiosa*** L. subsp. ***alpestris*** (Hegetschw.) Nyman

3.1 (APP), 17 (APP 2 exs., TO-HP, Herb. Gangale & Uzunov, Herb. Salerno)

It is considered "Not confirmed" in Piedmont, because all literature records refer to a generic data for the Alps reported in Fiori and Paoletti (1903-04) (A. Selvaggi, pers. comm.).

Centaurea triumfetti All.

[*Cyanus triumfetti* (All.) Dostál ex Á. & D. Löve]

3.1 (APP, HFLA), 4.1 (Herb. Gangale & Uzunov), 5 (TO-HP)

Centaurea uniflora Turra

4 (BI, HFLA, PORUN, Herb. Rizzieri Masin), 5 (APP, HLUC, MRSN, TO-HP, Herb. Bovio, Herb. Faraoni, Herb. Gangale & Uzunov), 6 (MSNM, Herb. Cancellieri), 12 (Herb. Gangale & Uzunov)

8 (Herb. Rizzieri Masin)

Tephroseris integrifolia (L.) Holub subsp. *capitata* (Wahlenb.) B.Nord.
3 (TO-HP), 4.1 (Herb. Gangale & Uzunov, Herb. Soldano)

Tolpis staticifolia (All.) Sch.Bip.
17 (TO-HP)

Tragopogon orientalis L.
4 (PORUN)

Tussilago farfara L.
3 (Herb. Salerno), 18 (TO-HP)

Adoxaceae

Sambucus nigra L.
2 (MRSN), 8 (TO-HP)

Caprifoliaceae

Knautia mollis Jord.
3.1 (APP 4 exs.), 4 (BI), 4.1 (MSNM, Herb. Gangale & Uzunov, Herb. Tilia), 5 (GE, HLUC, MRSN, Herb. Bovio, Herb. Cancellieri, Herb. Faraoni), 9 (HLUC, Herb. Rizzieri Masin), 12 (PORUN), 13.1 (APP 2 exs., MSNM), 16 (APP 2 exs.)

Scabiosa columbaria L. s.l.
3.1 (APP), 4.1 (MSNM), 5 (APP)

This taxon presents a considerable variability in Italy, not well understood yet. At present, the attribution to the subspecific rank of the collected samples is not possible (F. Conti and E. Banfi, pers. comm.).

Succisa pratensis Moench
8 (APP), 12 (Herb. Salerno)

Valeriana montana L.
6 (APP)

Valeriana tripteris L. subsp. *tripteris*
3 (Herb. Gangale & Uzunov, TO-HP), 6 (HLUC, MRSN), 18 (Herb. Salerno)

Apiaceae

Aegopodium podagraria L.
1 (MRSN, PORUN, Herb. Faraoni, Herb. Gangale & Uzunov, Herb. Salerno, Herb. Tilia)

Angelica sylvestris L. subsp. *sylvestris*
15 (MRSN, TO-HP)

Astrantia major* L. subsp. *major

1 (APP 2 exs., BI, HFLA, HLUC, MRSN, PORUN, Herb. Cancellieri, Herb. Faraoni 2 exs., Herb. Gangale & Uzunov, Herb. Salerno, Herb. Tilia), 2 (TO-HP), 3 (Herb. Gangale & Uzunov), 4 (PORUN), 18 (TO-HP)

***Astrantia minor* L.**

3 (HFLA, Herb. Cancellieri, Herb. Faraoni, Herb. Salerno, Herb. Tilia), 3.1 (TO-HP), 5 (APP, HLUC), 18 (TO-HP), 19 (TO-HP)

***Athamanta cretensis* L.**

3 (Herb. Gangale & Uzunov), 3.1 (HFLA), 4.1 (Herb. Gangale & Uzunov 2 exs.), 5 (APP), 18 (PORUN)

***Bunium bulbocastanum* L.**

2 (MSNM, Herb. Tilia), 16 (TO-HP), 17 (Herb. Gangale & Uzunov)

Bupleurum ranunculoides* L. subsp. *ranunculoides

3 (TO-HP, Herb. Cancellieri, Herb. Faraoni, Herb. Gangale & Uzunov, Herb. Salerno, Herb. Tilia), 3.1 (HFLA 2 exs.), 4 (BI, MRSN, MSNM, PORUN, Herb. Rizzieri Masin), 4.1 (Herb. Gangale & Uzunov, Herb. Salerno, Herb. Tilia), 5 (Herb. Gangale & Uzunov), 7 (HLUC)

***Bupleurum stellatum* L.**

4 (PORUN), 6 (APP, HLUC, Herb. Cancellieri, Herb. Faraoni), 6.1 (Herb. Gangale & Uzunov), 7 (Herb. Salerno), 14.1 (Herb. Rizzieri Masin), 15 (APP, HFLA)

***Carum carvi* L.**

2 (Herb. Gangale & Uzunov), 3 (Herb. Gangale & Uzunov), 4 (TO-HP, Herb. Cancellieri), 5 (Herb. Cancellieri), 18 (TO-HP)

***Chaerophyllum villarsii* W.D.J.Koch**

[*Chaerophyllum hirsutum* L. subsp. *villarsii* (W.D.J. Koch) Arcang.]

1 (APP, MRSN, PORUN, Herb. Gangale & Uzunov, Herb. Rizzieri Masin), 3 (GE, Herb. Cancellieri, Herb. Faraoni, Herb. Tilia), 4 (HLUC), 5 (MRSN, Herb. Gangale & Uzunov), 6 (MRSN), 7 (APP), 8 (TO-HP), 9 (HFLA), 13 (TO-HP), 16 (TO-HP), 17 (HLUC), 18 (PORUN, Herb. Faraoni)

***Imperatoria ostruthium* L.**

[*Peucedanum ostruthium* (L.) W.D.J. Koch]

3 (BI, TO-HP), 5 (MRSN, Herb. Gangale & Uzunov), 15 (TO-HP)

***Laserpitium gallicum* L. subsp. *gallicum* var. *angustifolium* (L.) Lange**

3.1 (APP), 17 (APP 2 exs.)

Pimpinella saxifraga* L. subsp. *saxifraga

3 (Herb. Bovio), 5 (TO-HP), 8 (APP), 10 (MSNM)

Nomenclature is according to Reduron (2008).

Siler montanum* L. subsp. *montanum

[*Laserpitium siler* L. subsp. *siler*]

17 (APP 2 exs.)

Trinia glauca (L.) Dumort. subsp. *glauca*

3.1 (HFLA), 4.1 (Herb. Gangale & Uzunov 2 exs., Herb. Soldano), 5 (Herb. Salerno).
