

SUPPLEMENTARY DATA

Manna Crespan, Daniele Migliaro, Silvia Vezzulli, Sara Zenoni, Giovanni Battista Tornielli, Simone Giacosa, Maria Alessandra Papisson, Susana Rfo Segade and Luca Rolle (2021). A major QTL is associated with berry grape texture characteristics. *OENO One*, 55(1). <https://doi.org/10.20870/oeno-one.2021.55.1.3994>

Figure S1. Hierarchical clusters of the 152 genotypes belonging to Raboso Veronese × Sultanina F1 population, obtained according to the normalisation applied for the texture parameters analysed: without normalization (a), normalised by berry diameter (b), berry surface (c), or berry volume (d).
