COST Action E49 “Process and Performance of Wood-Based Panels”

In cooperation with
Department of Forest Industry Engineering

Kahramanmaraş Sütçü İmam University, Karadeniz Technical University

Istanbul, Turkey, 28th and 29th April, 2009
PREFACE

The European wood-based panels (WBP) industry has developed considerably over the few decades and is of significant economic importance to the European Union (EU). The WBP industry adds value to Europe’s forests, processes wood wastes into new, useful products and provides direct and indirect employment to thousands across the EU. In recognition of this and of the growing competition outside of Europe, the COST Action E49 will help to ensure that both the panels manufacturing sector and the equipment suppliers in the EU will stay ahead of the increasing competition from abroad.

The aim of COST E49 “Processes and Performance of Wood- Based Panels” is to help the European wood-based panels sector to meet future demands and competition from other materials and markets through the scientific-based advance of wood-based panels and their production processes towards higher technical, economic and environmental standards. The objectives and work programme of E49 are shared between three Working Groups (WG): WGI – Process optimization and process innovation; WG2- Fundamentals and modeling and WG3 – Performance in use and new products.

The Workshop which is being held within the COST Action E49 is focused on Adding Value through Physical Functionality for wood based composites. Today’s society is characterized by increased mobility and demand for new solutions, and raw materials. The materials used should be low in weight, stable and with adequate mechanical and physical properties.

The aim of the workshop is review the state of art in the field of Adding Value through Physical Functionality for wood based panels, its production, properties and usage.

The Workshop has been organized by the Department of Forest Industrial Engineering, Faculty of Forestry, University of Sutcu Imam and Department of Forest Industrial Engineering, Faculty of Forestry, Karadeniz Technical University. Support and help also provided by the scientific committee, reviewers and by the COST E49 Management Committee. The organizer and the editor would like to thank to all that help at organizing this Workshop, reviewers, speakers and also session moderators.

I hope that you enjoyed the Workshop and that you will find these papers useful in your future work.

Process and Performance of Wood- Based Panels – Adding Value through Physical
Functionality

ORGANISING SCIENTIFIC COMMITTEE AND REVIEWERS

Mark Irle (Chairman)
Eleftheria Athanassiadou (Deputy)
M. Hakkı ALMA (Local Organiser)
Hülya KALAYCIÖGLU
Marius C. Barbu (Leader of WG1)
Heiko Thoemen (Leader of WG2)
Mizi Fan (Leader of WG3)
# TABLE OF CONTENTS

**Overview and Outlook on NDT Technologies for on-Line Control in the Wood-Based Panels Industry**  
Marius C. Barbu, Jörg HASENER ................................................................. 2

**Effect of Some Procudtion Parameters on Dynamic Modulus of Elasticity of Medium Density Fiberboard**  
Nusret As, Türker Dündar, Ümit Büyüksarı, Hüseyin Akkılıç .............................. 15

**Innovative and Competitive Chemical Technology for Production of Fire Resistant Wood Based Panels**  
Karolos Markesinis, Ilias Katsampas .................................................................. 26

**Dimensional changes and sound absorption properties of a new aluminium-foam core plywood**  
Negro F.\(^1\), Cremonini C.\(^1\), Properzi M.\(^2\), Zanuttini R.\(^1\) ............................... 42

**Physical and Mechanical Properties of Beech Plywood Made of Thermally Modified Veneers**  
Piotr Borysiuk, Marek Grześkiewicz, Mariusz Mamiński .................................. 57

**Thickness Swelling and Wettability of Structural Wood Based Panels Affecting by Heat Treatment**  
Onur Unsal, Zeki Candan, Umit Buyuksari ....................................................... 65

**The Influence of Thermal Treatment on Some Physical and Mechanic Properties Wood Based Composites**  
Abdullah İstek, Deniz Aydemir, Gökhan Gündüz ............................................. 77

**Effect of Recycled Wood on Particle Board Machining**  
Jorge Martins, Nuna Garrido, Luisa Carvalho, Joaquim Mendes, Carlos Costa...... 86

**Effect of Press Pressure on Surface Roughness and Wettability of Medium Density Fiberboard (MDF) Panels**  
Turgay Akbulut, Nadir Ayrilmis, Zeki Candan, Erkan Avci ................................. 100

**Colour Determination of Hydrothermally Recycled Particleboards.**  
Charalampos Lykidis, Athanasios Grigoriou .................................................... 110

**The Formation of The Cross- Sectional Density Profile of Wood- Based Panels**  
Heiko Thoemen .............................................................................................. 123
POSTER SESSION

The Effects of Resin Type and Decor Paper Pattern on Some Properties of Laminated Particleboard
Abdullah İstek, Soner Aksu, Hülya Kalaycıoğlu, Gökay Nemli.................................136

Investigation the Usage of Vine Pruning Stalks (*Vitis Vinifera L. Cv. Sultani*) As a Raw Material for Particleboard Manufacturing
Osman Göktaş, M. Hakki Alma .................................................................145

Properties Characteristics of Birch Plywood Currently Present on the Slovak Market
Roman Réh, Vratislav Hruška..............................................................................155

Density Profile of Particleboard Produced by Modified Pressing Diagram with the Temperature of the Pressing Plates 190, 200, 210 °C and High Moisture Content of Surface Particles
Ján Iždinský, Vilém Štefka..................................................................................165

Theoretical Model for Determination of the Maximum Difference in Particleboards Vertical Density
Julia Mihailova, Neno Tritchkov........................................................................175

Bending Properties of Cotton Boll - Cement Bonded Particleboard
M. Hakki Alma, Hülya Kalaycıoğlu, Ayfer D. Çavdar, Murat Ertaş, Alperen Kaymakcı.............................................................183
